WITH WHICH IS INCORPORATED THE NORTH END PROGRESS

PUBLISHED WEEKLY | DALY CITY, SAN MATEO COUNTY, CALIFORNIA, FRIDAY, FEBRUARY 26, 1926 | VOLUME 21; NUMBER 1

WORK PROGRESSING ON NEW CITY WELLS

A meeting of the board of trustees of Daly City was held Tuesday evening, as the usual meeting night, Monday, was Washington's birthday. A short session was held, the amount of business before the board not being as heavy as usual.

Trustee Moran reported favorable progress in the work on the new well at Citrus avenue and Niantic avenue, which will add materially to Daly City's already excellent water supply.

City Engineer Robert Classen reported everything being in good shape on the street improvements on Bellevue avenue.

An amendement to Ordinance No. 144 was adopted and ordered to be printed.

A number of bills were passed and ordered paid.

ILLUSTRATED LECTURE AT LOCAL METHODIST CHURCH

"English Shrines," or "How Christianity Came to Our Forefathers," was the subject of an illustrated lecture at the local Methodist chruch last Sunday evening. The lecture was illustrated by seventy colored slides, collected in England, Rome and other places. England's most beautiful abbeys were shown. The lecture dealt with the story of the progress of Christianity from the beginning to the landing of the Pilgrims in this country.

The final arrangements have been made for the anniversary dinner, to be held Friday, February 26, at 6:45 p. m. A musical program will be given by Mr. and Mrs. Henry W. Waltz, Jr., of San Jose. Tickets are, adults 50 cents, children 25 cents.

"Does it Pay?" will be the subject of the sermon by Mr. McClintic on next Sunday evening at 7:30 o'clock. Mrs. D. T. Bentley, and the choir, will sing.

OFFICIAL SUGGESTS OFFERING TRADE COURSES IN SCHOOL

J. C. Beswick, state supervisor of vocational and trade training, was a visitor at the Jefferson Union high school last week, and discussed the possibilities of installing trade courses in the school. These courses definitely prepare the student for some trade, for example, auto mechanic, carpentry or shoe making.

Mr. Best stated: "Courses along this line are just exactly what we need here. We have too many people in school who have very hazy ideas about what they want to be, and many are wasting their time. The trade courses not only prepare the students for the trade, but give a diploma at graduation and a recommendation to college."

He also stated: "If a student found after graduation that he was unable to go on to college, he might either drop the trade or use it as a means to help him gain a college education."

Each course requires four years, and the first half of the day is spent in the shop and the second half in class room work dealing with the trade the student is taking.

MEETING OF HISTORY CLUB

The next meeting of the California History Club of El Carmelo Parlor No. 181, Native Daughters of the Golden West, will be held at the home of Mrs. Horace Fellows, on Monday evening, March 1. Plans will be made for the celebration of Arbor Day, March 7, one of the special days of the order. The next regular meeting of the Parlor will take place on Wednesday evening, March 3, in Masonic Hall, Daly City, at 8 o'clock sharp.

INCOME TAX RETURNS ARE DUE ON MARCH 15

To assist income tax payers in preparing their 1926 returns, John P. McLoughlin, internal revenue collector, has designated two deputy collectors, Frank Foppiano and Gus Risso, to maintain offices in San Mateo county cities.

The tax returns are due in the internal revenue office not later than March 15, 1926, and the deputy collectors will collect taxes in addition to assisting citizens in filling out their returns.

Places the deputy collectors will stop and the dates they will be at these places have been announced as follows:

March 1—Half Moon Bay.
March 2—Redwood City.
March 3—Redwood City.
March 4—Burlingame.
March 5—Burlingame.
March 6—South San Francisco.
March 8 to 15, inclusive—San Mateo.

PARENT-TEACHERS PLAN PRESENTATION OF PLAY

A box lunch picnic Friday evening, March 5, is the next event planned by the Jefferson Union high school Parent-Teachers' Association. Arrangements were made at the last meeting, Tuesday night.

History students coached by Mrs. Pearl Warner presented a program honoring Lincoln and Washington. Three periods in the life of Lincoln were depicted in a playlet performed by Jack Sanderson, Norman Kennedy, Clark Williams and Edward Blaylock. Viola Rehaume gave a recitation about Washington, and William Klos talked on the importance of Washingon and Lincoln.

Following the program, a business meeting was held, and the members discussed plans for financing the organization.

Miss Block offered to coach and take charge of a play to be presented by the Association in April. The name of it is "The Red Lamp," and it is full of surprises and exciting action.

The students of the high school wrote a letter of appreciation to the P. T. A. for their kindness in providing refreshments for the class parties, and in helping to entertain them. All members of the Association were invited to attend the Colonial ball, which the high school students are giving tonight.

JUNIORS AND SENIORS FROLIC AT DANCE AND PARTY FRIDAY

Playing games, dancing and watching moving pictures, the Juniors and Seniors of Jefferson Union high school frolicked at a combined party last Friday night.

The beginning of the evening was devoted chiefly to playing games and having a lot of fun. Then everyone went into the study to see some moving pictures taken the previous day of some of the students serenading in the school tower and playing volley ball.

After the conclusion of the film the party adjourned to the auditorium and danced. The school orchestra provided the music.

When the party became dull a little entertainment was provided by the boys, under the direction of Archie Bloch, master of ceremonies. Gifford Teel and Albert Zanetti showed their wares, while "Windy" Barghoorn recited a thrilling poem.

Chocolate and cake was served by the parents of the students, under the direction of the P. T. A. Mrs. Stewart, a demonstrator for the Fluffo Shortening Company, made the cakes.

JEFFERSON STUDENTS WILL PRESENT THREE ACT PLAY

"Gypsy Trail," a three act comedy with a romantic setting and a cast of nine players, will be the next production behind the footlights at Jefferson high.

The plot centers around a girl who desires a romantic lover to make love to her. She finds a suitor who appears to be very romantic, but is in reality very conventional.

The cast will be picked next week and work will begin at once on the play under the direction of Miss Dannenbaum.

Miss Dannenbaum has issued a call for those who have dramatic aspirations and who are willing to work after school.

ALLOTMENT OF STATE SCHOOL FUNDS MADE

San Mateo county schools received $82,704 on February 20, when the state apportioned $6,762,561 in state school funds throughout California.

The high schools of this county were given $42,683, and the elementary institutions were granted $40,020, Will C. Woods, state superintendent of public instruction, announced.

This allotment represents the final apportionment for the fiscal year.

Los Angeles county obtained the largest sum under the apportionment, receiving $1,063,396 for its elementary schools, and $1,345,956.59 for secondary institutions, or a total of $2,414,382.59.

HARPER ANNOUNCES HIS CANDIDACY FOR SHERIFF

John J. Harper, chief of police of Burlingame, has formally announced that he will be a candidate for the office of sheriff of San Mateo county, at the primary election to be held on August 31, 19

Chief Harper, in his announcement, declared: "Several months ago a number of my friends suggested that I become a candidate for the office of sheriff of San Mateo county. Since that time the rumor has steadily spread that I would enter the campaign, and so I have given the matter very serious consideration and have decided to become a candidate."

CONTRACTORS BRING SUIT AGAINST SCHOOL

Suit for $9,081.66 alleged to be due them for the construction of the Jefferson Union high school building has been filed in the Superior Court, it is announced, by J. H. Sampel and William F. Cody, of Cody & Sampel, against the Jefferson high school district.

According to the complaint filed, Cody & Sampel were awarded a contract to construct the high school building March 24, 1924, for $117,800. Following the awarding of the contract they were instructed to install additional fixtures, bringing the contract figure to $127,335.23, the complaint states.

The building was accepted by the board of trustees on April 23, 1925, and they were paid $118,223.57, leaving an unpaid balance of $9,081.66, Cody & Sampel allege in their suit.

Mrs. Stella Jensen, clerk of the board, when interviewed, stated that the board had received no notice of the suit, but that undoubtedly the claim of Cody & Sampel was the outcome of a dispute as to deductions authorized by the high school architect, W. H. Weeks.

SCHOOL BOARD HOLDS AN INTERESTING SESSION

A meeting of the board of trustees of Jefferson high was held last Wednesday evening, all the members of the board being present.

It was unanimously agreed to send Miss Effie Potter, art teacher, to Los Angeles to attend a three day state conference of art teachers, and it was decided to pay her expenses. The conference will take place during the latter part of March.

The board went on record as being in favor of having the pictures of each class in Jefferson Spirit, the school annual. Mr. Mork, faculty manager of the annual, was present at the meeting.

Notices of election of one high school trustee were received from County Superintendent of Schools Abbott. They were signed and ordered posted. Mr. A. Gehringer, president of the board, announced himself as a candidate for re-election.

Mr. N. O. Best, principal, discussed the courses for next year. During the past week in a conference with Mr. Beswick, state superintendent of vocational and trade education, Mr. Best had discussed the possibility of putting in next year only three courses for beginners, namely, commercial, auto mechanics and home-making. These courses would prepare directly for entrance into trade, business or home. Each one would also give a high school diploma and recommendation to college, if grades were high enough.

After considerable discussion, the board expressed itself unanimously as favoring the courses in shop and business. Instead of the home-making course, it was suggested to offer a straight college preparatory course.

SACRAMENTO VALLEY HOLDS COTTON DAY

Cotton production during the past year assumed such proportions and aroused such interest in the Sacramento Valley that an all day cotton conference was held yesterday in Sacramento by the agricultural department of the Sacramento Chamber of Commerce, in co-operation with the extension service of the University of California, the farm bureaus and the U. S. Department of Agriculture. Last year 5,000 acres in the valley were planted to cotton, and gins were operated at Maxwell, Colusa county, and Palermo, Butte county.

LOCAL FIRE DEPARTMENT PLANS BIG SHOW MARCH 3

The members of the Daly City Volunteer Fire Department will hold a big show next Wednesday, March 3, at the State Theatre. There will be two moving pictures, a drama and a comedy. Besides these, there will be a fine program of vaudeville and singing put on by the firemen. Admission is 30 cents. Come out and boost our fire laddies.

REDWOOD CITY TO HAVE GREAT NEW SUBSTATION

The Pacific Gas and Electric Company has announced a quarter of a million dollar program in connection with the construction of a new substation plant at Redwood City. The present substation of the company will be abandoned.

The new substation, it was announced, will be on a ten acre tract, recently purchased, located just outside the city limits of Redwood City toward the bay. It will be directly opposite the Plant Rubber and Asbestos Works.

STUDYING PLAN FOR WIDENING HIGHWAY

In an effort to reach an amicable understanding for a concentrated effort to break for all time the Colma "bottle neck," representatives of the city of San Francisco, State Highway Commission and the Market Street Railway continued their discussion of the problem Wednesday at a meeting in San Francisco.

While no formal announcement of the progress of the meeting was made, it is understood that every party interested in the highway situation was in complete accord on the necessity of smashing the southern barrier.

Several plans are now under consideration, the one which proposes to widen the road to 150 feet being supported by the State Highway Commission and the city engineer of San Francisco.

An alternate plan has been proposed by the Market Street Railroad Company for leaving the tracks in their present position and the construction of two one-way roads, each forty feet wide, on either side of the tracks.

The Cypress Lawn Cemetery Association, which opposed the original plan on the grounds that it would be of excessive cost, is now studying the project from the architectural and artistic viewpoint.

Another session of the committee will be held next Monday, at which time it is expected that a definite announcement will be forthcoming of the complete project.

EL CARMELO PARLOR NO. 181 CELEBRATES ANNIVERSERY

El Carmelo Parlor No. 181, Native Daughters of the Golden West, celebrated its sixteenth anniversary by a dinner and dance at a down town restaurant on Thursday evening, February 25. More than half the membership of the Parlor was present and a most wonderful time was enjoyed by all.

Grand Trustee Josephine Johnson, El Carmelo's first grand officer; D. D. G. P. Rena Mathais; Mrs. Margaret McDonald, president of the Parlor, and the charter officers of El Carmelo No. 181 were the honored guests of the evening. Mrs. Margaret Steele, who was the charter president of the Parlor when it was instituted at Colma just sixteen years ago, and whose own birthday falls on this same day, was especially honored on this occasion.

The wonderful growth and present prosperity of the Parlor was the subject of hearty congratulations among those present.

Great credit is due Mrs. Rose Sweeny, who acted as chairman of the committee of arrangements, for the success of this event.

HEAVY RAINS ASSURE WATER SUPPLY HERE

San Mateo county now has ample water in storage to take care of all the needs of the people, including the normal growth in population, for all this year and part of the next, regardless of future rainfalls, as a result of the recent rains, according to Assistant Superintendent S. M. Millard of the Spring Valley Water Company.

"Up until January 28, this year, things looked very dubious for the water supply," said Mr. Millard. "At that date the storage reservoirs were at their lowest ebb, and the situation assumed a serious aspect. On January 28 last there were less than five billion gallons of water in storage, and that amount would not have been adequate for the rest of the year. January generally is a very wet month, but until January 28 the rainfall was negligible. Then the precipitation began, and continued steadily, so that we have added 8,300,000,00 gallons of water to the storage lakes since that date, bringing the total ily, so that we have added 8,300,000,000 gallons. That supply is ample for the rest of this year and will last over until well in 1927."

CUNNINGHAM WILL ATTACKED

Through his attorneys, Ross & Ross, Public Administrator W. A. Brooke has filed a complaint in equity in the Superior Court at Redwood City against Vittori Belli, seeking to annul her title to the estate of the late Ebenezer E. Cunningham, former city recorder of South San Francisco. Vittori Belli was Cunningham's housekeeper at the time of his death. Public Administrator Brooke sets forth in his complaint that she used undue influence in getting Cunningham to will her his estate. The estate is valued at $6,000.

Boy Will Lose Sight of Eye

Joseph Sammut, aged 8, of San Bruno, will lose the sight of an eye as the result of being shot with an air rifle by another boy.

LARGE CROWD LISTENS TO INTERESTING SERMON

Services at Grace Presbyterian church, both at Sabbath school and preaching, were well attended last Sunday. In the evening the house was well filled and the congregation listened to the sermon by Rev. Gatchell on "What Will You Give Me?" taken from the selling of Joseph and the betrayal of Jesus.

"We live in a commercial age. All seems to be measured by dollars. It's not what the world gives to us, but what we give to the world that counts," declared Rev. Gatchell. "Our forefathers gave us a land of freedom, faith and fidelity, belief in the Bible, God and home. Will we give this to coming generations?"

Special music was furnished last Sabbath by Miss Mildred Swan and Walter Parker. Mr. Anderson being sick, was missed very much.

Come and hear the music next Sunday.

The boys' club will meet for a feed at the manse on Saturday evening at 7:30.

The girls' club met with Mrs. Gatchell Tuesday afternoon and enjoyed special games and a social good time.

Theme for next Sunday evening: "The Three Greatest Crowns. Which One Do You Want?"

Come and help in community building.

The Ladies, Aid of Grace Presbyterian church will hold their regular luncheon at the church on next Wednesday at 12 o'clock noon. Come and try one of these good meals.

COUNTY FEDERATION P. T. A. HOLDS SESSION

Founder's day was especially observed by an appropriate program presented last Friday at the regular meeting of the San Mateo County Federation of Parent-Teachers' Associations at San Carlos.

Mrs. H. L. Hoover, chairman of Founder's day, introduced the speakers of the afternoon. Mrs. C. J. Brown, of San Mateo, gave an interesting history of the early formation of the Parent-Teacher Associations in San Mateo county, and said the first association was that of the Peninsular avenue school in 1914. Mrs. E. C. Bliel of San Mateo and Mrs. William J. Hayes of Burlingame, two past presidents, were introduced.

Miss Pansy Jewett Abbott, county superintendent of schools, spoke of the present benefits derived from Parent-Teacher Association work. It provides a splendid avenue of activity for the new mothers of the community and often efficiently and satisfactorily handles civic matters relative to the community. Miss Abbott and Mrs. E. D. Bliel were the charter members of the Federation present.

Mrs. George F. Keil, of San Francisco, distric Founder's day chairman, and past president of the district, spoke of the excellent future of the organization.

An amusing comedy was presented by the dramatic section of the Redwood City Women's Club, and two vocal solos by Mrs. Martin added to the pleasure of the program.

It was decided to write letters to the superintendents of the school districts in San Mateo county and ask in what manner the federation could assist the schools, and in what manner they have assisted.

The matter of having an entertainment consisting of talent in the associations was discussed and placed under the advisement of the finance committee.

The establishment of dental clinics in San Mateo communities was encouraged, and a committee was appointed to call a conference of the presidents of the associations in the respective towns to consider a workable plan.

Scholarship funds of the federation were voted to be distributed as gift funds. The money may be returned by the students benefitting from same if they so desire.

VISITACION VALLEY CENTER'S NEW HOME

Plans for the offical house-warming of the Visitacion Valley Neighborhood Center are being made by residents of Visitacion Valley. The community center will be completed within the next few weeks, and a gala program is being arranged to celebrate its opening.

The building housing the Center has been constructed by the men and women of Vsitacion Valley on Saturday afternoons and Sundays. It contains a gymnasium, men's lounging room, and a small stage for the presentation of neighborhood productions. Lumber for the building has been donated, and the Center will be maintained by funds allotted by the Community Chest.

SMUGGLERS BEACH BOAT AND ESCAPE

With several large rum runners from Vancouver anchored off the Golden Gate and following the wrecking of a rum boat at Half Moon Bay early Monday morning, when the crew made a daring escape and the liquor cargo of 300 cases was captured by the federal agents, a heavy patrol of fast cutter boats has been thrown out along the San Mateo county coastline by Captain Jacobs, San Francisco head of the coast guard.

Discovered while attempting to land her cargo of smuggled liquor, the motor boat was deliberately run upon the rocks at 2 o'clock Monday morning, while her crew jumped overboard, swam ashore and escaped under cover of darkness.

The motor boat was sighted by the coast guard cutter while the liquor smugglers were attempting to make a landing. Boatswain W. H. Payne, commander of the cutter, gave chase and the smugglers, finding themselves trapped, ran their boat upon the rocks. Efforts to capture the crew failed.

The cargo of 300 cases of assorted liquors was transferred to the cutter and was turned over to the San Francisco customs service at Meiggs wharf.

Fearing that the beached boat would become a menace to navigation, because she could not be floated, Boatswain Payne ordered the vessel destroyed by fire.

In the belief that other attempts to land the liquor of the Canadian rum ships will be made along the county coast, the extra patrol of cutter boats has been posted by the coast guard.

BUILDERS PLAN NEW PENINSULA CODE

Building inspectors, city officials and contractors of the peninsula met at the Burlingame city hall Friday night of last week and made preliminary plans for a new uniform building code for the peninula. It is planned to form a peninsula organization of building inspectors, and Inspector Walter L. Scott was appointed to outline a program for a future meeting to be held next Sunday. The cities of South San Francisco, San Bruno, Burlingame, San Mateo, San Carlos, Redwood City and Palo Alto will be represented at this meeting, and definite steps will be taken toward the new building code.

Representatives present at the meeting last week expressed themselves heartily in favor of the new code plan, it is stated. Inspector Scott stated that the proposed plan would simplify all supervison of building on the peninsula, and will be a great aid to contractors and builders. The present city ordinances are incomplete, he stated, and lead to general confusion. The new code would set definite standards and a uniformity of requirements of all peninsula construction.

HERE'S THE DOPE ON INCOME TAX LAW

Here is authoritative information on the income tax law that will be of interest and value to every one who is in the dark as to the provisions of the new legislation:

Any unmarried persons whose income was less than $1,500 between January 1, 1925, and December 31, 1925, does not have to report. If the total income was $1,500 or more, a return must be filed.

Any married person, living with husband or wife for that period, whose income was less than $3,500 between January 1, 1925, and December 31, 1925, does not have to file. If the total income of husband and wife was $3,500 or more, they must file.

A person married but not living with husband or wife for the taxable term, comes under the ruling for unmarried persons. If the income was $1,500 or more, a return must be filed.

An unmarried person who actually is head of a family whose members he or she is legally liable to support comes under the ruling of married persons. If the total family income was less than $3,500, a return need not be filed.

SAWED OFF SHOTGUNS FOR SOUTH CITY POLICE

The board of trustees of South San Francisco are now seeking prices on sawed off shotguns for the police force of that city, it is said, and if they can be secured at a reasonable price, the policemen of that city may soon be equipped with these deadly weapons. This action followed the meeting of the city trustees last Monday night, when Chief of Police Storek recommended to them that they secure these weapons.

Sick bodies made strong

"I was wasted to a skeleton, ready to cash in. Tanlac quickly built me up. A year ago diphtheria ran me down. Tanlac again came to the rescue. I'm strong and vigorous now." Miss Clara Jepsen, 1303 So. 15th St., Burlington, Iowa

After a spell of Grippe or flu, when your system is all run down and your legs are so weak they can hardly hold up your body, start right in taking Tanlac.

It's wonderful how soon you really do improve! Tanlac sails right in and puts the system in fighting trim. It cleans the blood, revitalizes the digestive organs, gives you an appetite for solid food and makes you feel like a new person.

Nothing will turn the trick quite as fast as Tanlac, made after the famous Tanlac formula from roots, barks and herbs. Buy a bottle today and get started back to full strength and vigor. Take Tanlac Vegetable Pills for constipation.

Break up with Musterole. The oil of mustard gives quick relief. Massage in gently with your fingers.

MUSTEROLE WILL NOT BLISTER

Better than a Mustard Plaster

CUTS and SCRATCHES

Stop the smarting and hasten the healing by prompt application of

Resinol

Distressing Feature

Mrs. M. C. Van Winkle, chief of the women's division of the Washington police department, said the other day:

"My experience leads me to think that boys are growing better while girls are growing worse. A distressing feature of the thing is that the more 'modern' a girl is, the worse she is, I mean, from the conservative viewpoint—the greater is her success.

"A modern girl got married not long ago to one of the richest and finest men in the country. A friend of mine made a neat comment on the match.

"'When girls are over-bold,' she said, 'men are bowled over.'"—Pittsburgh Chronicle-Telegraph.

IS IT YOUR STOMACH?

Sacramento, Calif. — "My stomach went back on me, everything I ate caused pain and distress, I grew nervous, weak and pale and it seemed that I had pains and aches all thru my body. I was too miserable to be around when I started to take Dr. Pierce's Golden Medical Discovery and it relieved me of all nervousness and stomach trouble and completely restored me to good health. I could eat without being distressed, in fact, I never felt better."—Mrs. Grace Sheldon, 3237-9th Ave. All dealers; or send 10c for trial pkg. of tablets to Dr. Pierce's Invalids' Hotel in Buffalo, N. Y.

Seek X-Ray Stain

To make the internal organs of the body opaque so that they can be photographed by X-rays, scientists are seeking a special kind of stain. It has already been discovered that injection of a special oil will make the lung cavities susceptible to registering on X-ray exposures and this, it is believed, will be of great aid in diagnosing tuberculosis.—Popular Mechanics Magazine.

During the last decade, the per capita consumption of meat in Europe has made an average increase of 50 per cent.

Colds *Fever Grippe*

Be Quick—Be Sure!

Get the right remedy—the best men know. So quick, so sure that millions now employ it. The utmost in a laxative. Bromide-Quinine in ideal form. Colds stop in 24 hours, La Grippe in 3 days. The system is cleaned and toned. Nothing compares with Hill's.

Be Sure It's HILL'S CASCARA BROMIDE QUININE Price 30c

Get Red Box with portrait

Green's August Flower for Constipation, Indigestion and Torpid Liver

Relieves that feeling of having eaten unwisely. 30c and 90c bottles. AT ALL DRUGGISTS.

EYES HURT?

Don't ignore the danger signals of aching eyes, red lids, bloodshot eyeballs. Mitchell Eye Salve removes irritation, redness, inflammation, soothes pain.

HALL & RUCKEL 147 Waverly Pl., New York

An Intensive Course in Natural History in the National Parks

By STEPHEN T. MATHER, Director, National Park Service.

NATURE study has a universal appeal, even when carried on only through the medium of books. The opportunities afforded in the national parks for such study among nature's own chosen conditions brought about a constantly increasing demand for intelligent interpretation of the various natural features in relation to their surroundings. Visitors to the national parks want to understand more not only about the rock formations and the geologic history of the particular area in question, but about the trees, flowers, birds, and mammals, and the Indians who are inseparably connected with the historic atmosphere of the region. In fact, everything that is preserved in its natural state in the national parks is an object of intense interest to visitors, and a ready subject for study and explanation.

Recognizing this consistent demand, I have endeavored for the past six years gradually to develop opportunities in the parks for students and visitors, by direct contact with the handiwork of nature, to take an intensive course in natural history, and during the past year the results have been particularly gratifying.

Biologists, geologists, and other scientists, with their classes, have enthusiastically made use of the opportunities for research and investigation afforded in the national parks. Now, however, our efforts are directed toward making it practicable for the average visitor to the park without much time at his disposal for personal research work or without the necessary scientific background to work things out for himself to acquire a practical knowledge of the natural history and the other exhibits of natural phenomena.

Locarno Marks an Important Stage in European and in World History

By LORD THOMSON, British Statesman.

The philosopher notes with hopeful satisfaction the progress made at Locarno, and measures its extent and permanence by seeking for answers to four questions: Why was France reasonable and conciliatory? Why was Germany forthcoming and for the first time diplomatic? Why was Italy helpful and sympathetic? Why was Great Britain almost officious as a reconciler?

Without in any way discounting the part played by idealism in the deliberations of the delegates, he finds these answers: The French franc was falling. Germany had urgent need of credit, and the German people passionately desired the evacuation of Cologne. Italian industry was being starved for lack of coal and raw materials. In Britain unemployment was increasing. In other words, Europe was staggering toward financial, industrial and political disaster.

Locarno marks an important stage in European and world history. The agreements signed by the representatives of all but one of the great European powers register not only ideals and aspirations, but also economic facts. This justifies the hope that they will not become mere "scraps of paper." The first requirements of war-stricken Europe were peace and security. Not even the most hardened cynic can deny that in the direction of these desirable consummations a great step forward has been made.

The Problem of the Government Toward the Alien Is Threefold

By SECRETARY J. J. DAVIS, in Annual Report.

The problem of the government toward the alien is threefold, to admit only desirable aliens as permanent residents; to insure that applicants for citizenship have the proper training; and to rid the country of those who are determined to be in the country to the detriment of our best national interests.

As to the smuggling of aliens into the United States, there is a remedy for that situation which could be effectively supplied—the enrollment of all aliens in the United States. I favor this plan, with provisions for an annual census of the unnaturalized and a system of education in Americanism which would give every alien an opportunity to learn the English language and something of American history, traditions, ideals and institutions.

For those whose presence is undesirable or who have gained residence through deliberate violation of law—the information gained through enrolment or failure to enroll—facilities could be provided for deportation.

"The Dear People Are Presumed to Keep Apace With All the Law"

By ROBERT W. BESSE, Sterling, Ill.

A close analysis of the situation discloses that the American people are getting away from the idea which stimulated the statesmen of those early days, to solve the problems that the people might be free in speech and comfort, and that all government came from the people.

On the contrary, now the states have a notion that the government is all powerful and that the people are mere subjects, to do the will of any notion they choose to write upon the statute books, and they write plenty of notions into laws, and everybody is presumed to know the law.

That stands very well as a legal presumption, but, practically, if every one were to know the law he would have to read continuously for 600 years, and then remember all he read. A lawyer is considered very capable if he is able to find the law, and more capable if he is able to interpret it in accordance with the last Supreme court decision, but the dear people are presumed to keep apace with all the law and then abide by it as their rule of conduct and keep out of trouble.

"Copyright Music Bill for Radio Broadcasting in Public Interest"

By SENATOR C. C. DILL, of Washington.

The copyright music bill for radio broadcasting which I have introduced is in the interest of public policy and for the benefit of radio listeners. It proposes to make copyrighted music available to all radio listeners by enabling radio broadcasters to reproduce such music by paying reasonable royalties to the copyright owners. The copyright owner may refuse permission to broadcast his production, but if he gives permission to one broadcasting station then all broadcasting stations may use it. The composer or publisher may authorize any station or stations to use his production free of charge, or he may fix a royalty less than the maximum fixed by law, but if no such agreement is made then the broadcaster may use the music by paying the maximum royalty. I purposely left the amount of the royalty blank, in order that it might be recommended by the patents committee and finally determined by congress after full hearings and careful consideration.

CALIFORNIA NEWS BRIEFS

Charges aired before the board of supervisors in Red Bluff, that various public dance halls in Tehama county were operating until unwarranted hours and that in some of them liquor was being served to minors led to the adoption of a stringent ordinance regulating the same. Proprietors of all such places must now secure a license and also pay $10 every evening a dance is held. Dancing must stop at two o'clock in the morning, except on Saturday night, when the closing hour is fixed at twelve o'clock.

Announcing that his attention has been called to failure of some California school districts to display the American flag over school premises, Will C. Wood, state superintendent of public instruction, has issued directions to county superintendents and principals to see that the flag law is "obeyed in letter and in spirit." Wood said that under the law the colors "must be hoisted above each school house during all school sessions, weather permitting."

Fifty steam shovels are at work on the new Southern Pacific main line Black Butte cutoff between Weed and Grass Lake, in Siskiyou county, Thomas Ahern, assistant general manager of the Southern Pacific said recently. The new Weed-Grass Lake route is about twenty-three miles long, and will cover a more level road bed than the old. The maximum grade on the new line will not be over 1.4 per cent.

There are approximately 5,000 unemployed laborers in Sacramento, the labor supply center for northern California, it was announced recently in a report by A. G. Anderson, manager of the state employment bureau. The number has been augmented during the winter, Anderson said, by "industrial tourists"—laborers who own automobiles and have come to California to avoid the cold months in Eastern states.

Members of the Associated Master Barbers and the journeymen barbers of Sacramento will be trained to answer any questions put to them by tourists. By an arrangement with the chamber of commerce, they will be taught facts concerning the growth of the city, food prices, building costs, wage scales, resorts and highways and the beauty spots in the Sacramento territory.

A state wide campaign for the complete eradication of the puncture vine will be launched by the California Association of Horticultural commissioners in ample time to get results, Frank Brann, horticultural commissioner of Tulare county, declares, as the result of the recent meeting and conferences of the commissioners of the San Joaquin valley.

The presidents and secretaries of the building exchanges of eleven cities in Southern California met in Santa Barbara recently, and adopted a resolution protesting the tendency "on the part of certain crafts to secure a five-day week." They also adopted a resolution favoring uniform building costs for all cities in California.

Fresno county's ton litter swine contest for 1926 will be held under the California Swine Breeders association rules of 1924, according to an announcement made recently by the assistant farm advisor, following a meeting in Fresno of the contest committee of the swine department of the Fresno county farm bureau.

The desert wastes around the irrigated lands of Imperial valley have been transformed by recent rains and mild winter weather into vast flower gardens. Thousands of acres are covered with wild flowers of many kinds. These bloom only during favored seasons, and this is the first year they have appeared since 1920.

While passing through his barnyard following the recent storm, H. R. Fairfield of Dutch Flat, Placer county, saw the glisten of gold. Investigtaing he found a $2.50 gold piece minted in 1859. The house he now occupies was built in the early sixties and it is supposed one of the early owners lost the coin.

George Thatcher, pioneer, who says he has lived near Oroville, Butte county, for sixty-eight years, recalls the day, years ago, when Oroville was the smaller of three sister cities half a mile apart. The other two places are now used exclusively for residence districts, while the business district remained in Oroville.

A force of boilermakers has nearly completed the installation of superheaters on the battery of boilers that furnish steam to drive the big turbine engine of all the California Door company plant at Diamond Springs, Eldorado county.

Legionnaires from Kern, Tulare, Fresno and Kings counties met in Visalia recently in the first interpost conference of the new year.

California motorists drove 10,492,318,368 miles within the borders of their state during 1925. This distance equals 47,377 trips to the moon, which is only 221,466 miles away from the earth at its nearest approach, according to Major Greene, chief engineer of the National Automobile club.

The first of the Southland's many colorful celebrations this season was held at Banning, Riverside county, February 4-7, when the Almond Blossom Festival took place. The almond is the first deciduous fruit to blossom in Southern California.

A training school for officials of the Woodland fire department was organized at Woodland, Yolo county, recently.

Since 1911 the University of Santa Clara, at Santa Clara, has spent $740,000 on building construction, said the president of the university.

Miss Theodosia Burr Prevost of the Tennent Memorial home at Pacific Grove, Monterey county, celebrated her one hundredth birthday on February 12.

A new fire engine and apparatus has been purchased by the residents of Forestville, Sonoma county. The need of an engine has been recognized for some time.

Hundreds of southern California walnut growers met at Santa Paula recently when Ventura county played host to the eighth annual Walnut Growers institute.

Mrs. Arabella Williams, pioneer of Trinity county and one of the oldest women within its borders, died in Hayfork in the old family home at at the age of 93 years.

The Gridley city hall at Gridley, Butte county, has been accepted as complete by the city trustees of Gridley. The building was constructed at a cost of $28,000.

Of the $6,506,218.30 apportioned to fifty-eight California counties by the state division of motor vehicles, Merced county received $12,824.47, it was learned from Sacramento recently.

The Pacific Gas and Electric company has started construction of the tunnel that is to divert Pit River to the new power house near Redding, Shasta county to be called Pit No. 4.

Articles of incorporation of the W. C. Cook Fancy Pack company of Clovis have been filed with the clerk of Fresno county. The concern has an authorized capitalization of $150,000.

The war department's rivers and harbors appropriation bill, which was passed by the house recently, provides among other things for allotments totaling $415,000 for the rivers of California.

Citizenship was restored to 500 naturalized Americans during 1925 through work of the California department of the state library in locating old records bearing on the various cases.

The new 42x72-foot gymnasium, recently completed by student labor at the Meadow Lake high school at Truckee, Nevada county, is unique, both in its construction and method of financing.

The California highway commission will spend $40,000 in Kern county for the purpose of widening and thickening the state highway for a distance of two and one-half miles north and south of Delano.

Bakers from Tehama, Glenn, Sutter and Butte counties held a meeting in Chico recently at which demonstrations tending to raise the standard of materials used in the baking business were given.

On land required for the construction of the city of Stockton's flood control dam and reservoir at Valley Springs the trial of 22 condemnation suits brought against owners of land opened recently.

Any attempt on the part of the carriers to increase the freight rates on crushed rock, gravel, sand and other road construction materials will be vigorously fought by the California Highway Commission.

Restoration of Boyes Springs near Santa Rosa in Sonoma county, as a summer resort, with an expenditure of $500,000, was the announced purpose of the Sonoma properties company, whose incorporation papers were filed recently.

Adjutant General R. E. Mittelstaedt announced recently that the nine airplanes of 1917 model which the air unit of the National Guard is using at Rockwell field, San Diego, have been in service steadily since 1924 without a single casualty.

Plans for sending the Stanislaus County Boys' Band to the Philadelphia Centennial Exposition as a representative of California were formulated at the American Legion caucus held in Modesto, Stanislaus county, recently.

Seven per cent of all the school children in Sonoma county are afflicted with one or more of the various speech defects, according to a report made by Mrs. Mabel F. Gifford, of Petaluma, on the survey conducted in the schools of the county recently.

Officials of the D. V. O. Products company, at Modesto, Stanislaus county, announced that the plant will be closed down and manufacturing processes discontinued until apparatus has been installed to do away with objectionable odors which have resulted in an investigation by the city council.

Paul T. Young, Modesto, Stanislaus county, realtor and captain of the Modesto national guard company, Company A, 148th Infantry, has been selected by Adjutant General R. E. Mittelstaedt as one of two California captains to go to Fort Benning, Georgia, to attend the infantry school.

The First National Bank of Auburn Placer county, with which is affiliated the Central Bank of California, with branches at Truckee, Colfax and Newcastle, have about completed plans for enlarging the present banking quarters and remodeling them into a modern banking institution.

The prosperity of California and the proper reception of the hundreds of thousands of people coming annually to the state was the keynote of the convention of the North Bay counties division of the California real estate association meeting held in Napa, Napa county, recently.

Hope Nevers Will Add Needed Punch

Ernie Nevers, Pacific Coast Star.

Ernie Nevers, all-American football star, college baseball, basket ball and gridiron hero, will be the observed of all observers when the Brownies gather at their training camp at Tarpon Springs, Fla., late in February. No athlete has broken into the major leagues with more publicity than has attended the signing of Nevers by Sisler, and the baseball world will be interested in the young athlete's efforts.

Nevers will have a sympathetic manager. George Sisler, leader of the St. Louis Americans, came to the big leagues straight from college. Sisler thinks highly of the college athlete. He believes that the college training makes the university athlete a better prospect because he can learn more quickly than the sand-lotter.

Remember Sisler.

Sisler came to the Browns from Michigan university, where he had been a star batter and pitcher. George was a great batter even then. But persons who remember Sisler's debut will be inclined to be patient with Nevers. George swung at bad balls. He was not a finished batter, but he had the ability, the baseball instinct and in a couple of years he was a star. Even in his case it took a long time to determine his proper place on the field and it was Fielder Jones who finally decided that the young Michigan graduate was a first baseman.

Owner Phil Ball, Business Manager Bill Friel and Secretary Willis Johnson consider Nevers a great prospect. They consider him only that, however. Baseball always is a gamble and the club was willing to pay high for Nevers' signature, on the chance that he might develop into another Sisler or Frisch.

A Great Athlete.

Nevers is a sturdy athlete. He has tremendous speed and persons who have watched him in action on the mound predict that he will rank some day with the best of the right-handers.

While his greatest fame was achieved on the gridiron, his admirers say that if college baseball drew as much attention as football Nevers would be as well known for his baseball as for his ability as a pigskin warrior.

Sisler does not need a great deal of added strength to turn the Browns into a championship team. If Nevers should deliver as a good pitcher or a hitter, he might add just the needed power. It certainly was a good chance to take.

Glenna Collett

Photograph shows Glenna Collett, woman's golf champion, basking under the winter sun of Palm Beach, Fla., where she is now enjoying the climate and the famous Southern courses.

Sport Notes

Soccer football is played in 40 countries throughout the world.

* * *

The Aerial Rowing club of Baltimore is 63 years old.

* * *

The Royal Henley regatta will be held this year June 30 to July 3.

* * *

Japanese women have taken up field hockey and are enthusiastic over the sport.

* * *

Fresco Thompson, young second baseman, has been bought outright from the Pirates by Buffalo.

* * *

The Minneapolis association baseball club has purchased Rube Benton, left-handed twirler, from the Cincinnati Nationals.

* * *

Johnny Beckman, famous forward of the original Celtics, a wandering basket-ball team of New York, gets $12,000 for his winter's play.

* * *

Zach Wheat was an initial sack guardian until he reported at Shreveport, La., in 1908, and found the position well cared for by "Chick" Gandil. He then became an outfielder and was acquired by Brooklyn, where he has played ever since.

* * *

Jean Dubuc, one-time pitcher of the Detroit Tigers, who has handled a number of minor league teams in recent years, has been signed as pilot of the Manchester (N. H.) team.

Ineffectiveness Blamed for Many Large Scores

Some evidence to support the claim of the ball makers that big scores were due to pitching ineffectiveness rather than to the lively sphere may be found in the records of low-hit games for the season.

The figures show 58 of these battles after July 4, the date set by the manufacturers for the curbing of the batters by the league flingers. These 58 games range from 1 no-hit battle to more than 40 four-hit contests. The total includes both leagues. Less than one-fifth of the number appeared in battles previous to July 4, which is regarded as the half-way mark in the season's schedule.

Tom Davies Selected as Grid Coach at Rochester

Tom Davies, of Pittsburgh, all-America half-back selection in 1918, 1920 and 1921, has been appointed head football coach at the University of Rochester, under contract for three years.

Davies, regarded as one of the greatest stars developed by Glenn Warner at Pittsburgh, will begin his work in March, when he takes over the squad for spring practice. He succeeds Herbert A. Lorenz, who resigned recently after two years with Rochester.

Jockey Is a Star

Willie Garner, youngest member of the riding family of Garners, is proving a real sensation on the New Orleans race track. The other day Garner was either one, two or three in six of the seven races. He is being heralded as the coming foremost jockey of the country.

LEONARD TO WAIT RING FANS' CALL

Will Fight Rocky Kansas When Public Demands.

Will Benny Leonard, retired lightweight champion of the world, fight Rocky Kansas of Buffalo, who recently won the title of champion from Jimmy Goodrich, also of Buffalo, winner of the New York lightweight tourney to determine a successor to Leonard?

Reports have been sent out from New York to the effect that Leonard would meet Kansas in an open air show in New York some time during the coming summer.

Benny at the present time is making a vaudeville tour of the country and it is all good advertising for him, and Benny is a good enough showman to know the benefit of such talk.

Despite the advertising arising from the controversy Benny Leonard is not seeking notoriety, but is sticking close to his show work.

During a talk in his dressing room **Benny made it plain that he is not** anxious to return to the ring, although he likes boxing for the sport and exercise he gets out of it.

"Many have approached me lately regarding a match with Rocky Kansas for the title," said the retired champion, "but I have not even given it serious consideration. In the first place, if there was anything doing it would be done through my old manager—Billy Gibson—for he is the only

Benny Leonard.

one whom I would work with. I have beaten Kansas three times and feel that the public would not want to see us in the ring again.

"As I said before, I do not wish to enter the ring again, not because of all that sob stuff about mother, etc., but for the very good reason that I wish to retire from the game.

"I have the greatest respect in the world for my mother's wishes, but she has made no request here and would not. She stated her side long ago, preferring to have me quit the ring and I have always respected it.

"If the public should ask me to come back and meet the best lightweight in the world I would do so, for the reason that it was the public, or rather boxing fans, who made me and I owe it to them to do their bidding. So that is where the matter rests—entirely with the fans. If they want me to come back I will do so, otherwise not."

Sporting Squibs

Jiu-jitsu is being taught at Montreal A. A. A. by boxing teachers.

* * *

The record attendance for a football game in England is 131,672.

* * *

The Bisons are trying to get Toronto to switch Outfielder Frank Gilhooley to them.

* * *

Blair V. McMillin, Jr., an end on the 1924 Pittsburgh football team, has been elected captain of the 1926 squad.

* * *

Al. Niehaus, first baseman, has been sold by the St. Paul association club to Atlanta of the Southern association.

* * *

Freddie Welsh, former lightweight champion, is said to be the only vegetarian who ever won a world boxing title.

* * *

Ernie Nevers, all-American full-back this year, is planning to enter the University of Wisconsin to finish his college course.

* * *

Quincy of the Three-I league has traded Pitcher Bert Grimm to Decatur for Outfielder Vic Ruedy and Pitcher Guy Morrison.

* * *

Luis Firpo, Argentine heavyweight, has begun light training for his match against Erminio Spalla of Italy, to be held early in March.

William Neanix, former Boston A. A. hurdle star, has been appointed head of the physical training department of the Boston English high school.

* * *

Earl Hamilton, formerly on the pitching staffs of the St. Louis and Detroit American league and the Pittsburgh National league clubs, who retired from baseball last season, has signed to report to the Los Angeles team this spring.

The American Legion

(Copy for This Department Supplied by the American Legion News Service.)

PLANS PROTECTION OF BENEFICIARIES

William Raduszis of Cleveland, Ohio, has been sentenced to serve from three to ten years in the penitentiary for embezzling from his brother, John, an insane World war veteran, $11,372.42 paid as disability compensation by the government.

Investigation was started last spring by the Cuyahoga county council of the American Legion. The embezzlement was discovered by Louis Laeger, rehabilitation officer at the government hospital at Chillicothe, Ohio, where John Raduszis is confined.

Mr. Laeger made inquiries as to why no money was received at the hospital to pay for incidentals for the insane man. Then investigation was started by the Legion organization, which led to the arrest and conviction of William Raduszis, who had been named as the brother's guardian. About $3,000 was recovered and will be conserved in the estate of the veteran.

Such conditions in the affairs of guardians of mentally incompetent veterans and minor orphans and others who are beneficiaries of the United States veterans' bureau are being constantly uncovered by the Legion and the national guardianship service of the veterans' bureau, which have been co-operating in a strict investigation of the guardianships.

Shell-shocked veterans are confined without care in many instances, the investigation is revealing. War orphans are neglected and hungry, while their guardians have been buying furs and automobiles with funds paid for the benefit of these wards of the government.

Plans are being considered by the Legion for setting up a state judge advocates system which will provide in every county an attorney who will guard the interests of bureau beneficiaries. Such a system is already in very successful operation in Illinois.

"A very large percentage of those who were originally appointed as guardians of bureau beneficiaries were not qualified for the trust," Maj. David G. Arnold, national guardianship officer of the veterans' bureau, says. "When called on recently to account for the administration of their trusts, they were unable to do so. Insufficient bonds, in some cases none at all, were given. Sureties were often of no responsibility. In many cases, as a result, the beneficiary has lost all the money that was paid by the government to the guardian for his account."

Forty-Acre Tract Used for Legion Playground

"Inspiration Home in God's Country." That is what they are calling the first completed unit of the first national playground of the American Legion. The camp is in the Legion's 40-acre tract in the San Isabel forest near Pueblo, Colo. It was recently dedicated.

The government set aside on request the 40-acre plot in the forest for the exclusive use of the Legion. The camp was established and is being operated by posts of the Legion at Westcliffe, Pueblo, Alamosa, Walsenburg, Florence, Canon City, Trinidad and Center.

Libraries for Hospitals

Installation of a complete library service in every hospital under the control of the United States Veterans' bureau is contemplated by Director Frank T. Hines, according to information received by the national rehabilitation committee of the American Legion. Legion officials were largely instrumental in this step in the interest of the disabled.

Truly Rural

The guest from the city was enjoying his first meal on the farm.

"What delicious beans!" he commented. "But I suppose they meant many hot hours in the fields."

"You bet they did," said his host. "We have to raise a good heap of truck to make enough to buy many cans of them beans."—The American Legion Weekly.

Incurable

"Dey ain' no jestice no mo'," mourned Rufus to a friend. "Sam, Ah's a sick man. Guess Ah's gwine die, suah. Ah goes to de doctah, an' he says mah veins am too close. Says Ah got very close veins. An' de oney help fo' me, he says, am to eat chicken brof free times a day, an' stay in nights. An', Sam, dat jes' kain't be done!"—American Legion Weekly.

Variation No. 26,884

"Why did you name your little boy Prescription?" Mrs. Naylor asked her colored cook.

"'Cause," was the answer, "Ah has sech a time gittin' him filled."—American Legion Weekly.

To War on Accidents

War has been declared by the American Legion post at Burbank, Cal., on the ever-mounting number of traffic accidents. A program of education and co-operation with traffic authorities has been undertaken.

Your own physician will confirm this doctor's statements.

The real cause of bad breath

"You cannot 'cover up' unpleasant breath for any length of time. The only way to rid yourself permanently of it is by removing the cause.

"Sometimes poor teeth are responsible. But the commonest cause of a coated tongue and offensive breath is constipation. You may not realize that your intestines are slow in eliminating waste matter, or that your breath is objectionable. But others will notice it.

"Get rid of constipation, and your breath will become fresh and sweet. Even more important, you will notice an immediate improvement in your health and spirits."

Nujol relieves constipation in Nature's own way

Constipation is dangerous for anybody. Nujol is safe for everybody. It does not affect the stomach and is not absorbed by the body. Medical authorities approve Nujol because it is so safe, so gentle, and so natural in its action.

Nujol simply makes up for a deficiency—temporary or chronic—in the supply of natural lubricant in the intestines. It softens the waste matter and thus permits thorough and regular elimination without overtaxing the intestinal muscles.

Nujol can be taken for any length of time without ill effects. To insure internal cleanliness, it should be taken regularly in accordance with the directions on each bottle. Unlike laxatives, it does not form a habit and can be discontinued at any time.

Ask your druggist for Nujol today. Remove the cause of bad breath and begin to enjoy the perfect health that is possible only when elimination is normal and regular.

Nujol

THE INTERNAL LUBRICANT

For Constipation

Natural Question

"Some children are just naturally bright."

"Yes? What did yours do now?"

Evil is wrought by want of thought as well as want of heart.

Evidence

Boy—I don't want to sell it, I te you.

Luckless Angler—Well, then, let me just measure it so I can truthfully say how big the fish was that got away from me.—Passing Show.

Children Cry for

Fletcher's CASTORIA

MOTHER:— Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep.

To avoid imitations, always look for the signature of Chas. H. Fletcher. Absolutely Harmless - No Opiates. Physicians everywhere recommend it.

Capital

Teacher—Now tell us, Johnnie, which is the least-used bone in the human body?

Johnnie (promptly)—The head!

Nearest to Europe

Portland (Maine) is the nearest United States port to Europe.

Finland Plans Deep Harbor

The Finnish government is planning to improve the port of Viborg, its largest export harbor, by deepening the sea channel to admit large ships.

Lots of people marry money, but th license is always made out under a other name.

WASHINGTON, THE MAN

Monday, February 22, marked the 194th anniversary of George Washington's birth. In view of a recent controversy over the personal characteristics and habits of the Father of Our Country, a brief reference to some less familiar facts of his life seems timely, his public record being almost universally known.

He was born on a Friday, apparently not an unlucky day for him, nor for the great nation of which he was destined to be the founder. His great-grandfather, John Washington, came from England and settled in Virginia in 1657.

George Washington was the son of Augustine Washington, by his second wife, nee Mary Ball. After his father's death when he was 11, the lad was under the guardianship of his half-brother, Lawrence, with whom he visited the West Indies, where he had smallpox. He was appointed a midshipman in the British navy, but was prevented from going to sea through the objections of his mother.

Otherwise, little is known of his boyhood and the various stories concerning it, including that of the "hatchet and cherry tree," have no historical basis. He had only a very elementary education, excepting in mathematics, in which he was principally self-taught, and at the age of 16 became a surveyor.

Later he inherited the family estate at Mt. Vernon and married a wealthy widow, Mrs. Martha Curtis, becoming one of the richest men in America, owning 70,000 acres of land in Virginia and later 40,000 acres further west, given him by the government for his military services.

He was a large slave owner, but hoped for the ultimate abolishment of slavery. He was not a prohibitionist. He was a member of the Episcopal church. He was a powerful man, more than six feet tall, with big hands and feet, sandy hair and blue eyes. Mrs. Washington was small and plump, with dark hair and hazel eyes.

During his career Washington was at times most violently denounced by his opponents, who tried to deprive him of command of the army, condemned him for approving the location of the national capital near Mt. Vernon, spoke of his contemptuously as "the step-father of his country," and even hinted at the propriety of building a guillotine for his execution. He once considered resigning from the presidency and later expressed regret that he had not done so.

But the great mass of the people were unswervingly loyal to him to the end, and he might have had a kingly crown had he so desired. In the final judgment of the American people he has fully sustained the eulogy passed upon him at his death by the great Marshall:

"First in war, first in peace, and first in the hearts of his countrymen."

WISE MERCHANTS

There is a remarkable firm of general merchants in the little town of Clear Lake, S. D., which probably holds the world's record for consistent and adequate advertising in a community of that size.

English & Towers have carried a full page advertisement in the Clear Lake Courier every week, without a miss, for twenty years. They have contracted for a similar space for each week of 1926.

Yet Clear Lake is a town of only 835 population, in a county with but 8,759 people, with two newspapers. The extent of the firm's advertising with the other newspaper was not stated in the source of our information, but it is reasonable to suppose that it was considerable.

From their extensive and persistent advertising, English & Towers appear to be pretty thoroughly sold on the proposition. As the Courier says: "They have proven to their satisfact. a that large space in the newspaper regularly brings correspondingly big results."

Many Daly City merchants might profit by the experience of these live merchants of the little South Dakota town, who are making money, and know why they are making it.

Mr. Donovan of Boston promised to quit work when he had made a million, and kept his word. We are sometimes tempted to make a similar vow.

AIRCRAFT AND PEACE

In view of the forthcoming conference at Geneva for further disarmament, it is naturally the hope and desire of all well disposed people that some measure of success may attend these efforts.

The disarmament conference called by President Harding in 1921 had an excellent moral effect, but it only made a very imperfect beginning in the direction of permanent peace, as it did not limit the use of submarines or other naval vessels except capital ships, neither did it restrict the size of armies.

In any consideration of disarmament, the subject of aircraft must ultimately hold an important place. Yet aircraft is an agency of peace as well as war.

Suppose the armies and warships were reduced to an absolute minimum. Then the nation possessing the largest number of aircraft would have the advantage in the event of war, for aircraft built for commercial purposes can be used as engines of destruction upon short notice, by equipping them with machine guns and bombs.

Can the building of aircraft be restricted? With the present dream of airways circling the globe, with airplanes and dirigibles crossing the oceans as easily as trains now cross a continent, can the progress of aviation be halted? Who shall say how many airplanes the United States may use for transporting freight and passengers? Who shall set a like limit for other nations, to which they will agree?

This is only one of the tremendous problems which the Geneva conference must face. The most encouraging fact about the whole situation is that the nations are at last willing to discuss these problems in a friendly manner, in an effort to preserve the peace of the world.

NEW DISTRICT FORESTER

The recommendation of Forester W. B. Greeley that Stuart B. Show be appointed to the position of district forester in the California district, United States Forest Service, has been approved by the Secretary of Agriculture.

Mr. Show is a graduate of Stanford University and received his technical education in forestry at the Yale forest school. He will succeed Paul G. Redington, who has been chief of the California district for the past six years, and will soon leave for his new assignment as assistant forester in Washington.

The new district forester is ably fitted by education and wide experience to handle the many and complex forestry problems of the state. Born in Nebraska, his father being the late Professor A. B. Show, for many years with the history department at Stanford University. Mr. Show has been and officer of the United States forest service in this state for more than sixteen years. He started as a student forester on the Shasta national forest, and has steadily advanced to the position of assistant district forester in forest research, which work has taken him into practically every forest region in California.

Mr. Show will assume his new duties as district forester at the forest service headquarters in San Francisco on March 10.

FROM WEEDS TO WOOLENS

The shepherd with his flock of sheep has been sung in verse and story. He is a familiar figure in history and in literature. Grazing flocks are accepted as a picturesque part of Alpine landscape.

In the high mountain regions of our own West, you will also find flocks of sheep—and at lower elevations, herds of cattle. These flocks and herds which the traveler meets in the national forests are not there especially to add to the scenery. They are grazing under government permit and are allowed for distinct economic reasons.

In most forest regions are found forage plants and weeds. If unused, these die and bry up, becoming a forest fire hazard and an economic waste. Where other important interests of the national forests are not endangered, this forage is used for the grazing of sheep and cattle. For the use of this resource a fee is paid into the federal treasury, one-quarter of which comes back to the counties for schools and roads.

Thus are waste grasses and weeds converted into important by-products—wool, meat and leather.

SOAKING THE INVESTOR

An unusual item appeared in a North Carolina newspaper recently. It told of a citizen of that town, who owned a piece of property desired by a corporation as a location for a new enterprise. He said: "Take it and pay me what you care to."

According to the customary practice he would have asked two or three prices for the land, especially if he knew that it happened to be particularly suitable for the investor's purpose.

How many cities and towns are retarded in growth and prosperity by greedy individuals who seek the opportunity to "soak" the newcomers planning to establish a new industry?

The spirit shown by this citizen is the sort that helps to build up a community. The contrary attitude kills the goose even before it begins to lay the golden eggs.

THE VANISHING ICEMAN

Within the last year electric refrigeration has rapidly acquired a widespread importance through the linking up of co-operative effort between refrigeration manufacturers and electric power companies.

The great advantages of household refrigeration are, its automatic and steady operation, its ability to maintain a lower temperatiure of dry cold with entire absence of moisture, drip and dirt, and its better conditioning of refrigerated food.

Parallel with household refrigeration has developed iceless storage of ice cream for confectionery stores, soda fountains and restaurants. The prospects for electric refrigeration extend even further and include the florist and fine fruit trade, milk cooling, as well as certain processes of food manufacture.

Considering only the household market for electric refrigeration, the possibilities for this growing industry are enormous. Less than 1 per cent of the market has been sold, although unit sales have doubled each year for the last five years. With over twelve million homes wired for electricity, the number of household electric refrigerators is expected to soon reach the washing machine figure, which is nearly 4,000,000.

It is estimated that the iceless refrigeration units which will be manufactured this year will require almost 30,000,000 pounds of copper.

FARMERS HELP SELVES

While much discussion of relief legislation is going on, with little prospect that any of it will solve the farmer's problem, in many parts of the country the farmers themselves are making plans which will help more than anything congress may be expected to do.

They are becoming convinced that the salvation of the farmer rests largely upon raising his own living at home. They are accordingly planning to have some poultry, a cow or two, and at least one sow and litter of pigs on every farm. They will see that a good garden is planted and properly cultivated. They will raise their own food and stock feed, so that less cash shall be spent for these things.

These intelligent farmers know that they can produce most of the food necessities of life, without seriously interfering with the raising of their main crop, whether it be wheat, corn, cotton, or some other staple product.

They are also learning that a less number of acres planted with the best seed and properly cultivated will produce more profitable crops than a larger acreage not properly handled.

While less capable farmers pin their faith to the politicians, these live-at-home advocates are adopting plain and sensible measures to protect themselves.

WANT TO BE SHOWN

Missouri business men have formed an organization "to show the tax wastage and to formulate a plan whereby the present methods of administration may be improved so the taxpayers may receive a larger return."

They propose to examine the whole state administrative system and also that of the counties. Such an effort should be welcomed by every public official, as well as by the people.

Several other states have formed similar organizations, and others are planning to do so.

President Coolidge intimates that some speeches in congress are made for political effect. Who would have thought it?

ORDINANCE NO. 150

AN ORDINANCE OF THE CITY OF DALY CITY AMENDING THE PROVISIONS OF ORDINANCE NO. 144 OF SAID CITY ENTITLED "ORDINANCE DIVIDING THE CITY OF DALY CITY INTO RESIDENCE, COMMERCIAL AND INDUSTRIAL DISTRICTS, AND GOVERNING THE LOCATION OF CERTAIN INDUSTRIES THEREIN, AND PROHIBITING THE ESTABLISHMENT OR MAINTENANCE OF CERTAIN BUSINESS OR INDUSTRIES IN SAID DISTRICT" BY EXCLUDING THEREFROM CERTAIN TERRITORY.

The Board of Trustees of the City of Daly City do ordain as follows:

Section 1. An Ordinance of said City of Daly City, No. 144, entitled "Ordinance Dividing the City of Daly City into Residence, Commercial and Industrial Districts, and Governing the Location of Certain Industries Therein, and Prohibiting the Establishment or Maintenance of Certain Business or Industries in Said District," passed and adopted as an Ordinance of said City on the 10th day of August, 1925, is hereby amended to read as follows:

Section IV of the Ordinance mentioned in the preceding paragraph is hereby amended by excluding from the district therein described all that certain lot, piece or parcel of land, situate, lying and being in the City of Daly City, County of San Mateo, State of California, and particularly described as follows, to-wit:

Lot 29, Block O, Mission Street Land Co., of said City.

Section 2. The City Clerk is hereby ordered to have this Ordinance published once in the Daly City Record, a weekly newpsaper of general circulation in the City of Daly City, and hereby designated for that purpose. This Ordinance shall be in effect from and after its passage.

Passed and adopted as an Ordinance of the City of Daly City by the Board of Trustees of said City, at a regular meeting of said Board held February 23, 1926, by the following vote, viz.:

AYES, and in favor of the passage of said Ordinance, Trustees: BODIEN, O'ROURK, MORAN, SUNDERMANN, SMITH.

NOES, Trustees: None.

ABSENT, Trustees: None.

H. H. SMITH,
Mayor of the City of Daly City.

ATTEST: B. C. ROSS,
Clerk of the City of Daly City.

Colma News Notes

By SYLVIA HAUBRICH FISCHER

Mr. Varni, who was very ill for several days, is now recovering.

J. T. Casey made a business trip to South San Francisco last Saturday.

Mr. and Mrs. Thomas Hickey visited Louis Lagomarsino at Stockton on Tuesday last.

Lawrence Fischer, of South San Francisco, spent last Monday at the Haubrich home.

Otto Schramn and a party of friends spent the week end at Truckee, attending the snow carnival.

The new Richfield gasoline station on Mission street near Price street is now open to the public.

Mrs. B. W. Haubrich and Mrs. S. V. Fischer spent Thursday of this week in San Francisco.

Mr. and Mrs. P. L. Peterson, of Mission street, entertained a number of relatives at dinner recently.

Miss Elsia Alger, of San Francisco, spent Washington's birthday at the Haubrich home, on Mission street.

Miss Eva Homier returned home Tuesday from Truckee, where she spent the week end at the snow carnival.

Stephen Fischer and Marian Ficher attended the Koib and Dill performance at a down town theatre last Saturday evening.

Misses Esther Forsell and Alice Twesten attended a dance at Fraternal Hall, South San Francisco, last Saturday evening.

Mrs. William Doyle, of South San Francisco, was in town last Tuesday.

Mrs. Della Bianchini spent one day of last week with San Francisco friends.

Mrs. Beatrice Batz, who was ill at St. Luke's hospital, San Francisco, is now quite well.

Mrs. Ernest Barsi and Mrs. Fernando and baby son spent last Thursday in San Francisco.

Mr. and Mrs. Merlo, of Vale street, entertained relatives from San Leandro one day of last week.

Mrs. Graziani and son Bobbie, of First avenue, spent Wednesday of this week in San Francisco.

Miss Katie Terrango, of South San Francisco, recently visited at the Franzoia home on Price street.

Mrs. Mamie Conserva and daughter Eleanor visited Mrs. Henry Lorenz, of Mission street, last Wednesday.

The Wednesday evening lectures of Father P. J. Diamond of the Salesian order, at Holy Angels church, are well attended.

Mr. and Mrs. Carl Jones, of San Francisco, visited Mr. and Mrs. Earle Jones, of First avenue, one evening last week.

Misses Rosa Bauer and Thelma Selmi attended a masquerade ball in San Francisco last Monday evening, with friends.

Bill Doyle is now delivering the San Francisco newspapers in a new Dodge delivery truck purchased from David Aratta, local dealer.

P. Conci, local florist, has purchased a new Dodge delivery truck and is building a new florist shop at his place on Sloat boulevard.

Mr. Fernando, of Bruno avenue, who has been ill with blood poisoning at the South San Francisco hospital, had a finger amputated.

The Italian Benevolent Society, Colombo, Inc., held a very successful ball last Sunday evening in the new Colombo Auditorium, Colma.

A most successful whist party was given by the Girls' Club in the Colma Community Center library building on Dunk street last Saturday evening. Julius Schindler's orchestra provided the dance music.

Mrs. M. Doyle and daughter, Miss Agnes Doyle, of School street, and Mr. and Mrs. Eugene Gannon and son, of San Francisco, visited Mr. and Mrs. James F. Doyle, of Sausalito, on Washington's birthday.

Mary Pickford in "Little Annie Rooney" was shown at the New Colma Theatre last Tuesday and Wednesday evenings. An entertaining prologue was presented with Little Annie Rooney and her gang in person. A large crowd attended.

The whist and dance held by the Colma Girls' Club last Saturday night in the Colma Community Center was a big success. There were twenty-six tables. The music was excellent and the party dispersed about 1 a. m., all very much pleased with the evening's entertainment.

A meeting of the ladies of Colma will be held Wednesday afternoon, March 3, at 2:15 o'clock, in the Colma Community Center. The purpose will be to form a Ladies' Auxiliary to the Center in order that the women of Colma may better aid their community.

The cast has been selected for the comedy to be presented by the Santana and Santangelo Clubs in the New Colma Theatre on Monday evening, March 15. Miss Collopy, who is a dramatic teacher, is coaching the players. All are working hard to make this affair a great success.

Miss Olga Selmi, of Mission street, was recently tendered a surprise miscellaneous shower in San Francisco by a large number of her friends. She was the recipient of many lovely gifts. The evening was spent in dancing and games were enjoyed until a late hour, when a delicous spread was served.

The Colma Community Center will hold a big whist party and dance in the Center hall next Saturday, March 6. The Pompeian orchestra will furnish the music. It is necessary to make several major repairs to the building, and the Center desires to raise the entire amount at this one affair. Support it well.

Lorraine Wall, Ruby O'Connor, Margaret Varni, Sylvia Fischer, Tessie O'Connor, Grace Johnston and Elsie Fahey, of the drill team of El Carmelo Parlor No. 181, Native Daughters of the Golden West, returned home Tuesday from Truckee and Donner Lake, where they spent several days enjoying the winter sports there. They enjoyed the sleighing, bob-sleding, tobogganing and skiing.

A large class of children received the Holy Sacrament of Confirmation in Holy Angels' church on San Pedro avenue last Sunday. The Sacrament was conferred by the Most Reverend Archbishop Edward J. Hanna, and Miss Mary Belli was the godmother and Manuseto Granucci the godfather. Father Bertola and the Sisters of the parish worked hard to prepare these children to receive the Holy Sacrament.

WELCOME HOME JIMMY

"One for the money, two for the show. Everybody ready? Lets go."
"Where to?"
"New Colma Theatre!"
"When?"
"March 15, Monday evening."
"What time?"
"Eight o'clock."
"Well, now, what's it all about? What's the joke? What's doing at the New Colma Theatre, March 15, Monday evening, at 8 o'clock?"
"You old dead head! Where have you been? When did you come out of the daze? Do you mean to say that you haven't heard about our professional actors and actresses under the direction of Miss Collopie?"
"No! Oh sure, I know it's the same troupe that put on the 'Henpecked Husband,' isn't it? Oh, boy! I'll say I'm going, and bring my gang, too. Well, well, now please tell me who these players are. How much longer do I have to wait?"
"Oh, I'm coming to that now:
Mrs. Brooks.....Clara Belli
Lucile Brooks.....Rose Dianda
Peggy Sommers.....Anita Varni
Allie Thomas.....Rosa Bauer
Chesterfield McSwope .....
..... Mansueto Granucci
Valentine Gardner.....Albert Belli
George Pierce.....James Varni
Danny Banks.....Ed. Devincenzi
Jimmy ..... ? ?
"Just go and find out who Jimmy is. So long till next week, dead head, and let's see how much you know by next time." R. B.

A GRIM RECORD

Death came peacefully in sleep a few nights ago to William C. Patterson, "the world's oldest hangman and first electrocutioner," at his home in Hornell, N. Y., at the age of 84.

Mr. Patterson was hangman at the Auburn prison, New York, for years before the electric chair was substituted for the rope, and during his long service as executioner had put fifty-four convicted criminals to death.

These included Kemmler, the wife slayer, the first man to meet death in the electric chair; Mary Farmer, first woman to be executed; Leon Czolgosz, assassin of President McKinley, and many others whose crimes attracted world-wide attention.

Shortly before his death, when asked whether he believed he had ever executed an innocent person, Mr. Patterson said: "It is a good rule of life to mind your own business. I was not employed at Auburn as a judge."

His was a grim record, but he seems to have taken his job philosophically, and from the ripe age he attained it appears that if he was ever haunted by memories of his victims, his days of piracy and [illegible] not materially shortened thereby.

VIEWS IN BRIEF

By Marcy B. Darnall

Search for an appropriately offensive epithet for those who violate the prohibition law continues, although "scofflaw" was once awarded a prize in that line. Two new suggestions are "canarchist" and "bowlshevik."

Colonel Mitchell's resignation has been accepted and he will go upon the platform to carry his appeal for air service reform to the country. Being out of the army, he may now begin to fight in earnest.

Noah W. Cooper, of Tennessee, chairman of the Methodist Sabbath Crusade, wired all railroad presidents, asking that Sunday trains be abolished. None replied, except President F. D. Atterbury of the Erie, who said he "would be delighted to abolish Sunday trains; they lose money."

Wishing to hang himself comfortably, H. W. Dyer, of Lewisham, England, padded his neck before placing the rope, with the result that his efforts were a failure and he will live.

Equal rights for men and women were demanded and opposed by two rival delegations, both from the National Conference of Women in Industry, who called on President Calvin Coolidge recently. The women, like the farmers, seem unable to agree upon what they want from congress.

Pay of French army officers has been slightly increased. Marshal Foch, supreme commander of Allied forces in the World war, will now receive the equivalent of $3,000 a year. Tom Mix, movie hero, is said to receive a salary of $3,333 a day.

Those who swear by the World's Almanac or make bets on its accuracy should look out. On page 817 of the 1926 edition it gives the 1924 vote of Alabama as follows: Coolidge, 112,966; Davis, 45,005.

It is sometimes unwise to display too much skill. Mrs. Florence Allen, of Chicago, defeated her husband at golf, chess and bridge, and he beat her up on each occasion, according to her testimony before Judge Sabbath, who granted her a divorce.

An unknown individual with a queer twist in his brain has been wreaking vengeance on the public library at Cornwall-on-Hudson, New York, at intervals for the past year. He breaks into the library, destroys valuable books, scatters the card index records about and plays havoc generally.

According to an Eastern minister, people do not always attend church from religious motives. He related that a large crowd thronged a church at Plymouth, Vermont, when President Coolidge was present, and that they carried away so many hymn books for souvenirs that there were not enough left to sing by the following Sunday.

FACTS ABOUT THE TELEPHONE

About two-thirds of the business of taxicabs comes through telephone calls.

About half the number of telephones in Louisiana are located in the city of New Orelans.

In 1899 there were less than 500 telephones in the city of Quebec. Now there are about 17,000.

There are 62,689 telephone subscribers in the city of Rochester, N. Y., just 53,520 more than there were twenty years ago.

More than nine million calls per year are handled by the private branch telephone exchange of one of Chicago's largest department stores.

In one telephone exchange in the city of Hartford, Conn., there are six pairs of sisters employed, and one set of three sisters, while the matron has two daughters serving as operators.

One thousand six hundred operators are employed in Milwaukee by the Wisconsin Telephone Company. That is equal to the total number of telephones in the city just forty years ago, in 1886.

NOTICE OF FILING OF LIST OF ASSESSMENTS UNPAID

NOTICE IS HEREBY GIVEN that on the fourth (4th) day of February, 1926, GEORGE A. KNEESE, Superintendent of Streets of the City of Daly City, filed with me, the City Clerk and ex-officio Clerk of the Board of Trustees of said City of Daly City, a complete list of assessments unpaid under that certain assessment, diagram and warrant issued the 23rd day of March, 1925, to Chambers & De Golyer, said assessment, diagram and warrant being for the work and improvement contracted for, and the contract therefor completed and fulfilled, under and pursuant to the provisions of the "Improvement Act of 1911," as amended, and the provisions of the "Improvement Bond Act of 1915," as amended, and also under and pursuant to Resolution of Intention No. 27, passed and adopted by the Board of Trustees of said City of Daly City on the 14th day of October, 1924, and other resolutons, notices and proceedings duly adopted and taken thereunder, reference to said Resolution of Intention being hereby expressly made for a description of the work.

NOTICE IS HEREBY FURTHER GIVEN that interested persons may appear before the Board of Trustees of said City at the regular meeting of said Board of Trustees to be held on March 8, 1926, at the hour of 8:00 P. M. of said day, at the regular meeting place of said Board, and show cause why bonds should not be issued upon the security of the unpaid assessments as shown on said list, that being the time hereby fixed by me for such purpose.

Dated this 10th day of February, 1926.

B. C. ROSS,
City Clerk and ex-officio Clerk of the Board of Trustees of the City of Daly City.

Published in the Daly City Record two times.

Last publication February 26, 1926.

TALLEST TOWER WILL BE BUILT BY P. G. & E.

What engineers say will be the highest electric transmission tower in the world is being erected by the Pacific Gas and Electric Company as a part of the new 220,000-volt line now being built from Vaca-Dixon substation to Antioch. The record-breaker, which will be at the crossing of the Sacramento river, near Rio Vista, will be 459 feet high, rising 30 feet higher than the new telephone headquarters, San Francisco's tallest building.

To get its lines across the Sacramento and San Joaquin rivers and at the same time comply with the federal government's clearance requirement for navigable streams, the company must put up five steel towers ranging in height from 269 to 459 feet, two at the Sacramento crossing and three at the San Joaquin crossing. The tallest tower of the latter span will be 359 feet.

Structural designs for the towers were made by Walter Dreyer and D. M. Robinson, company engineers, and the work of erection is being directed by E. H. Steele, who has charge of the company's line construction.

Because the lands along the rivers at the crossing sites are low, the towers have to be built unusually high. The same condition makes it necessary to drive piles 80 feet for a foundation.

Without a splice in the wire, six copper-clad steel cables will stretch from anchorage to anchorage, 7,029 feet, nearly a mile and a third, across the Sacramento, and 8,835 feet, more than a mile and two-thirds, across the San Joaquin. Supporting towers will be necessary to maintain the prescribed clearance height, but there is to be a single unbroken span of 4,135 feet over the Sacramento river, and one of 3,175 feet over the San Joaquin.

The line will end three miles south of Antioch, where the company is building its Contra Costa substation. With the new line operating at world's record voltage it will be possible to carry directly a larger block of power to the industrial district centering around Pittsburg and Antioch.

PORTION OF FISH AND GAME ACT UNCONSTITUTIONAL

A decision written by Judge Frederick W. Houser, of the District Court of Appeal for the Los Angeles district, has just been handed down by which it is determined that that part of the fish and game act which purports to regulate the manufacture of fish fertilizer, by permitting a pack of sardines using one-pound oval cans only to use whole fish for fertilizer purposes is unconstitutional.

The ruling, which is of great importance to the fish canning industry in this state, is based upon the unjust discrimination contained in the statute which favors the packer using one-pound oval cans, as against a packer using smaller cans, as well as against the smoker, the dryer, or the salter of sardines.

There is an average every day in the city of St. Louis of more than 1,250,000 local telephone calls and 3,333 long distance calls. The average number of suburban calls is 17,413.

The meek shall inherit the earth, and the inheritance tax will keep them that way.

Keep Tube From Vibrating

If the tube elements are not rigid, they will vibrate easily, producing rating and howling noises. A tube that vibrates easily is said to be microphonic. Such a tube will produce distorted sounds when the loudspeaker is tuned in the direction of the set, because the sound wave, striking the receiver, causes it to vibrate, and the grids of the tubes to shake.

[illegible]ers, the same as used for cleaning the stems of ordinary smoking pipes, for removing dust from between condenser plates and from other otherwise inaccessible places. It would be good practice for the set owner to carefully dust his set in this way, as often as once a month.

To Build Loop

A loop one foot square will work with a sensitive receiver. Set the two crosspieces in the shape of an X and attach the upright piece to one of them. Cut slots in the end of each of the four ends of the crosspieces to receive four pieces of hard rubber 7 by 1 by ¼ inch. Now wind 26 turns of loop wire or standard single lamp cord ¼-inch apart about the rubber pieces set perpendicular to the frame of the loop.

SPRING AFTERNOON FROCKS; FLOWER COLORING IN HATS

HEER and colorful are many of spring's prettiest frocks. It is a ight most gratifying that materials ve been brought to such a point of rfection that, while they are sheer d dainty, they are also practical and litarian. Notwithstanding the fact their exquisiteness and sheerness, y wear and wear and wear. No nder that any and every descendant the crepe or georgette family is ain very popular. There is crepe uise, for instance, which is heralded a most fashionable material for the ring frock; it can trace its ancestry rect to the family tree of georgettes. sheerness is its charm, accented is season with wondrous tones and nts, for every rainbow hue from light- t pastel to strong vivid shades is presented in the newest georgettes d crepes.

One of the popular shades anticited for spring is tarragon green. his is the color of the frock of crepe

uise which is here pictured. The row flouncings arranged in tiers cross the front demonstrate how racefully this fabric yields to cunning reatment. Each of these shallow, flat ffles is hemstitched with gold hread. There is a bouquet of flowers mbroidered in thistle coloring on the ront of the waist with a further touch the ornate in the fluttering bows of rchid ribbon which tie the wrist nds of the sleeves. That thistle ines and orchid be combined with reen in this smart afternoon frock xpresses the new color tendency, hich is to use contrasting shades to- ether for greater effectiveness.

Lace, dyed to match the diaphanous eorgettes and crepes, is used for yoke ffects, godets and circular inset flares.

Very smart, too, are georgette and affeta frocks, the latter applied in a rimming way in the form of flounces, orderings and for many intriguing etails.

For practical wear black, henna, avy and dark green are favorite hades, while for dressier occasions atrancing pastel colors prevail.

With the increasing popularity of eer frocks the costume underslip ains in importance. Transparent ess tops and sleeves depend for harm in appearance greatly on the erfection in coloring and fit of the ip underneath.

It is a clever idea to own two or hree slips for the same frock. A ark underslip should be acquired for ractical wear, and for elaborate ef-

Frock of Crepe in Tarragon Green.

ect the metal cloth slip is charming. Under plain chiffon dresses gay print k slips are very effective.

There is a new fad on in the realm of fashion, and it has to do with erky, colorful little felt hats. It s the vogue for the immediate moment, to own at least two and even as many as three or four cunning felts, each in one of the newest delightful colors. To carry out the idea, there must be a boutonniere to match each hat. Some like the single large chrysanthemum, others prefer a quaint bouquet of wee flowers, while still others favor a metallic rose or bud.

Becoming? Try pinning a gay flower on your somber fur coat collar, this with a cunningly draped and ipulated hat of exotic coloring and our mirror answer the question. just what color would one choose to best follow the fashion? First and foremost buy a green hat, either love-bird, chartreuse or almond. Next in popularity comes rose, be it bois de rose or any allied shade. Blue, both bright and copenhagen, finds favor, with wild honey and gray in very pronounced favor. Thus through their gay flower colorings, do these inexpensive first-of-the-season chapeaux forespell the coming of spring.

Here is a very good argument in favor of acquiring more than one of these gaily colored felts. Now that silk print frocks of multi-coloring are the fashion, no matter which hat you wear, it will be sure to enter into the general color scheme, and there you have it, a different color ensemble for every occasion, and at not much expense at that.

The gigolo crown promises to be popular. The orchid felt hat shown at the center left in this group carries this new crown, also the brim turns up at the back, which is quite proper for it to do. The latest thing for milady's spring hat is green bangkok with a felt brim, as illustrated at the bottom to the right in the picture. The top hats accent youthful off-the-face brims.

Hand-painted felt hats are very interesting and exceedingly smart this season. Very lovely color schemes are worked out, such as, for instance, orchids or violets on a pastel blue felt, or daisies and buttercups on a gray background. Futurist and conventional motifs vie with floral patternings.

Some Spring Hats.

Scarfs in solid color to match the felt or bangkok hat is fashion's latest whim. Is your most becoming color old rose? Then have hat and scarf exact match shade with, as before suggested, a boutonniere to complete the ensemble.

(©, 1926, Western Newspaper Union.)

GUARDING EYES FROM BIRTH

PROTECTION of the eyes should begin at birth, according to the report recently submitted to Secretary of Labor J. J. Davis. This report made by the division of child hygiene of the children's bureau is based on a careful study of over two thousand children under the school age at Gary, Ind. On the strength of this report, the Eyesight Conservation council states that the time to begin to preserve sight is at birth.

Out of the two thousand children examined over one-third had some amount of defective sight. In over 5 per cent, the defect was serious and in most cases had not even been suspected. Two and one-half per cent had crossed eyes and only one of these cross-eyed children had had anything done to correct this defect. Many of these children were nearly ready to enter school and to begin to use their eyes, although many of them had defects of vision so serious as to make it impossible for them to do their school work satisfactorily.

Leaving out all thought of the child's comfort, welfare or future it doesn't seem to be very good business policy to tax the public for money to build, equip and maintain schoolhouses, pay teachers and furnish textbooks and then send children to school who can't see.

The Eyesight Conservation council, then, is quite right when it concludes in its report that education is largely dependent on good eyesight.

Care of the eyes must actually begin at birth. The eyes of all new-born babes should have a few drops of silver nitrate solution dropped into them at birth in order to prevent infection which, if left untreated, may cause many cases of total blindness. This is now required by law in many states. Since the eyes of new-born babies are not fully developed the baby should sleep in a darkened room for the first month. When taken outdoors, as it should be often, the baby's eyes should be protected from the direct rays of the sun.

As the child grows older, toys, games, pictures and puzzles should be large and clear. The child should not be allowed to strain his eyes with anything which requires close inspection or to play or read in dark corners or by a fading light. On the other hand, exposure to strong, glaring and unshaded lights should also be avoided. The child who starts out in life with poor vision is badly handicapped.

OUR WINTER PLAGUE

THE winter and early spring months are the times when pneumonia is common. This disease is as old as human life. It has been called by some physicians the natural end of the old person. It is also prevalent in the earliest years of life, being most common from the first to the third year and from the sixteenth to the eighteenth.

Increasing knowledge gained during the last fifty years has given us practically complete information regarding the cause of this universal disease, how it affects the body and how it can be recognized. But we know little if anything more than we knew 100 years ago as to how it can be prevented, why it attacks one person rather than another and how it can best be treated. The mortality rate today is just about the same as it was a century ago or if anything higher.

There are two points, however, on which the best authorities of today differ from those of a century ago. The old idea was that pneumonia was principally a disease of the lungs and that all the other symptoms were secondary and due to the lung conditions. This is shown by the terms "lung fever" and "inflammation of the lungs" which were formerly applied to pneumonia. Today, the best authorities consider pneumonia as an infection of the entire body and the lung condition as secondary to and resulting from this general infection. So the poultice and various applications which were formerly applied to the chest are now regarded not only as of no value but actually harmful, as they disturb and exhaust the patient, who needs all his strength to fight the disease.

The other changed idea is that most of the drugs that were used for years in cases of pneumonia are now regarded as of little value. There is no drug, serum or preparation known which has any effect on this disease. It runs a definite course more regular than that of any other disease. It is one of the few diseases in which that much abused word "crisis" really applies. In the great majority of cases, on the eighth day the temperature falls suddenly and if the patient is going to get well, he begins to improve.

There are just two things a pneumonia patient needs—rest and fresh air. The more you fuss with him, either with medicine, plasters or applications, the less chance of recovery he has. A cool room, 50 to 55 degrees, light but warm covering, plenty of water and all the sleep he can get will do him more good than all the drugs he can take.

Daddy's Evening Fairy Tale

THE BIRTHDAY

"Grunt, grunt," said Brother Bacon, "I've something to tell you, friend pigs."

"What Is It, Brother Bacon?"

"S q u e a l, squeal," said Miss Ham, "what is it, Brother Bacon? What is it?"

"Grunt, grunt," said Grandfather Porky Pig, "tell your grandfather what it is."

"Grunt, grunt, squeal, squeal," said Brother Bacon's m o t h e r, "you must tell your dear mamma all about it."

"S q u e a l, squeal," said little Black Squealer, "I'd like to hear, too.

"I'd like to hear a secret."

"Grunt, grunt," said Sir Percival Pork, "let us hear what it is, Brother Bacon."

"Let us hear, grunt, grunt," said Sir Benjamin Bacon.

"That's what I say, grunt, grunt, squeal, squeal," said Pinky Pig.

"Squeal, squeal, that's what I say," said Master Pink Pig.

"Grunt, grunt, I say the same," said Master Pinky Pig.

"Squeal, squeal, so do I," said Mrs. Pink Pig, and Pinky's mother said:

"Grunt, grunt, tell us, Brother Bacon.

"We want to hear," said Sammy Sausage. "Grunt, grunt," he added, "we want to hear."

"Grunt, grunt, tell us what you have to tell us," said Grunter.

"Well," said Brother Bacon, "it is the usual way. You all grunt and squeal so much about wanting to hear that you don't give me a chance to speak."

"Speak, grunt, grunt," said Grandfather Porky Pig.

"Speak, squeal, squeal," said Miss Ham.

"Speak, grunt, grunt, squeal, squeal," said Brother Bacon's mother.

"Speak, grunt, grunt," said Sir Percival Pork.

"Speak, grunt, grunt," said Sir Benjamin Bacon.

"Speak, grunt, grunt, squeal, squeal," said Pinky Pig.

"Speak, squeal, squeal," said Master Pink Pig.

"Speak, squeal, squeal," said Master Pinky Pig.

"Speak, squeal, squeal," said Mrs. Pink Pig.

"Speak, grunt, grunt," said Pinky's mother.

"Speak, grunt, grunt," said Sammy Sausage.

"Speak, grunt, grunt," said Grunter.

"I will at once, grunt, grunt, before you get a chance to interrupt me again," said Brother Bacon.

"I haven't had a birthday in ever so long, not in ever and ever so long, and the last one I thought I should have I never have had.

"So I should surely have one now.

"Besides today is a Saturday, I believe, or maybe it is a Friday, or maybe a Thursday, or maybe a Wednesday, or maybe a Tuesday, or maybe a Monday.

"But anyway one of those days will do as I was born on one of those days.

"So now make up for your past performances upon birthdays I have wanted to have—perf o r m a n c e s where you did nothing for me at all."

"Grunt, grunt, I should say not," said Grandfather Porky.

"S q u e a l, squeal," said Miss Ham, "I should say not."

"Grunt, grunt, I should say not," said Brother Bacon's mother.

"Squeal, squeal, I should say not," said little Black Squealer.

"I'd Like to Hear, Too."

"Grunt, grunt, I should say not," said Sir Percival Pork.

"Grunt, grunt, I should say not," said Sir Benjamin Bacon.

"Grunt, grunt, squeal, squeal, I should say not," said Pinky Pig.

"Squeal, squeal, I should say not," said Master Pink Pig.

"Squeal, squeal, I should say not," said Master Pinky Pig.

"Squeal, squeal, I should say not," said Mrs. Pink Pig.

"Grunt, grunt, I should say not," said Pinky's mother.

"Grunt, grunt, I should say not," said Sammy Sausage.

"Grunt, grunt, I should say not," said Grunter.

So Brother Bacon could not celebrate his birthday.

Correct

"Now," said the teacher, impressively, "why should we endeavor to live by our own efforts?"

"Because," replied Tommy, "we're no knowing when the alarm clock will go wrong."—Tit-Bits.

New Scientific Light on Plant Intelligence

An intoxicated carrot has convinced Sir Jagadis Chandra Bose, the British plant physiologist, that plants have intelligence.

Sir Jagadis is more than ever convinced that trees fall in love just as human beings do, as a result of his latest experiments. The intelligence of plants, he says, approaches the instinctive intelligence of the lower forms of animals. He bases his conclusions on observation of the injection of alcohol, chloroform, carbonic acid and other chemicals into living plants. He also has looked into arboreal amours on the spot.

Trees apparently select other trees nearby as objects of affection, Sir Jagadis said in an interview. Trees thus smitten send out tendrils to enfold the objects of their affection.

By injections, Sir Jagadis said he was able to make a carrot drunk or to make it lose consciousness. Plant fibers really are muscles, he contends.

Cuticura Soap for the Complexion.
Nothing better than Cuticura Soap daily and Ointment now and then as needed to make the complexion clear, scalp clean and hands soft and white. Add to this the fascinating, fragrant Cuticura Talcum, and you have the Cuticura Toilet Trio.—Advertisement.

Raw Diamonds Not Costly

Diamonds are sold at an average price of $16 a carat at the mines in South Africa, while purchasers pay from fifteen to twenty times as much for the cut gem in this country. The rarity of fine stones, an expert says, is but one factor in the high price. The great amount of high-grade labor expended to turn the raw stone into a finished gem is the main item.

The cutting process involves the constant risk of spoiling the entire stone. A first step consists in cleaving the specimen with the grain and requires great care and skill. Small ends are recut into brilliants, while the gem itself is faceted on top and bottom.

The next process involves the lapping of the remaining facets, which requires more time than the cutting and causes the stone to lose from one to two-thirds of its weight.—Popular Mechanics.

DEMAND "BAYER" ASPIRIN

Aspirin Marked With "Bayer Cross" Has Been Proved Safe by Millions.

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 25 years.

Say "Bayer" when you buy Aspirin. Imitations may prove dangerous.—Adv.

Would Bridge War's Chasm

Prof. E. M. Borchard of Yale recently opened a lecture course at the Berlin university. He said in his opinion his chief task consisted of re-establishing international scientific relations and preparing the way for the resumption of German-American exchange of professorships such as existed before the war.

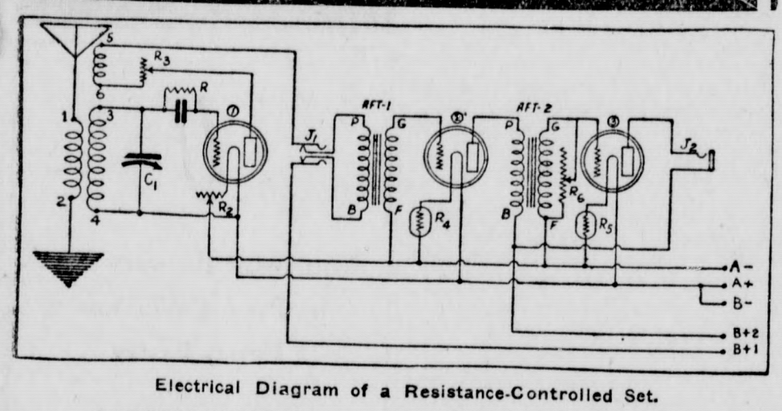
RADIO



Electrical Diagram of a Resistance-Controlled Set.

By PERCY WARREN

In Radio World.

The most that can be accomplished on three tubes, in volume and DX, is by the use of the three-circuit tuner, followed by two transformer stages of audio. There are many variations of the fundamental design of the detector part and there are respective advantages in each. The set shown herewith has the following main features:

(1) A variable resistor controls regeneration.

(2) A variable resistor controls volume on the audio side.

Smooth regeneration control is obtained by using a fixed tickler with the variable resistor in parallel or, as in this case, in series with the plate coil.

The tickler, placed in inductive relation to the grid of the tube, produces feed-back, which makes the tube oscillate when the resistance is not high enough to prevent that.

One terminal of the variable resistor R3 should go to the plate and the other to the coil. Now as we vary the resistance of this, we can increase or decrease the effective inductive value of the tickler.

Wiring the Set.

On the tuner, used in the detector circuit, there are six posts, each one of which is numbered. Post 1 goes to the antenna clip on the terminal strip. Post 2 goes to the ground clip. Post 3 goes to one terminal of the grid condenser and to the grid leak R. The other terminal of this combination goes to the G post of socket 1. Post 3 also goes to the stationary plates of the only variable condenser, C1. Post 4 goes to the rotary plates of this same condenser, and to the F+ post of socket 1. Post 6 is internally connected to one terminal of the stationary tickler winding. One terminal of the resistance R3 goes to the P post of socket 1. This has 6 marked on the post. Post 5 goes to the top terminal of a double-circuit jack, if such a jack is to be used. Otherwise connect this terminal to the P post of the AFT 1.

The B post of this AFT goes to the B+1 post (Det. on strip). If the jack is to be used, connect the B post to the inner terminal, and the bottom to the B+ Det. clip. The G post on AFT 1 goes to the G post on the socket 2. The F post on AFT 1 goes to the A— clip. The P post of AFT 1 goes to the P post of socket 2. The B post goes to the B post of AFT 2, and to the bottom terminal of the single-circuit jack. The G post goes to the arm of the clarostat, and to the G post of socket 3. The resistance wire post of this clarostat goes to the F— post on the AFT 2. The B posts of both AFT'S go to the B+ Amp. clip. Now you can use two individual ballast resistors. R4 and R5, as per diagram, which are placed in the negative leg of the amplifier tube filaments. All the F+ posts go to the A+ clip. Connect the A+ to the B—.

List of Parts.

One 3-circuit tuner (includes coils and R3).

One .0005 mfd. variable condenser (C1).

One 2 meg. leak (R).

One .0025 mfd. grid condenser.

Two low ratio audio-frequency transformers (AFT1, AFT2).

One single-circuit jack (J2).

One double-circuit jack (J1).

Two amperites (1A or 99, R4, R5).

One clarostat (R6).

One 4-inch dial.

Two knobs.

One 20-ohm rheostat (R2).

For Code Practice in Radio Communication

Those who have a longing to know the code used in radio communication will find the circuit shown in Figures 1 and 2 useful in the practice of sending and receiving dots and dashes. The system is especially applicable to radio clubs, school classes, and other organizations desiring a means for group practice.

The material needed is a buzzer capable of producing a high-frequency note, a telephone induction coil, a

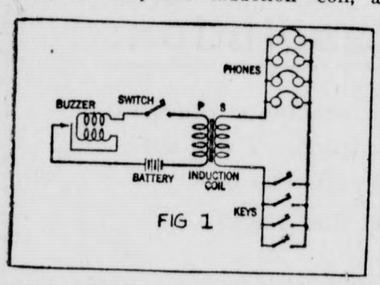


FIG 1

switch, a key and pair of phones per person, and the necessary batteries.

By arranging the parts as shown in Figure 2 the circuit may be controlled by any one of the keys.

Only the keys, buzzer, coil, binding posts, etc., need be mounted on the [illegible] of the operating table while all wiring is made on the under side. [illegible]may be seen from the schematic [illegible]ram in Figure 1 the secondary-[illegible]phone circuit is a series parallel one allowing provision for additional operating positions, the signal being

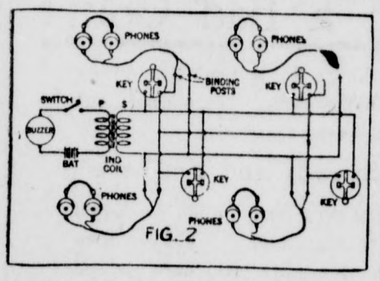

FIG. 2

heard in all the phones. In this way it is possible to maintain intercommunication between the several receiving points.

By putting the buzzer in a continuously operated circuit, the tone produced will be more constant than if the several keys were used to interrupt the buzzer circuit. Also, by placing the keys in the secondary side of the circuit there will be no appreciable "lag" or "key thump" in the signals as transmitted.

Keep Tube From Vibrating

If the tube elements are not rigid, they will vibrate easily, producing rattling and howling noises. A tube that vibrates easily is said to be microphonic. Such a tube will produce distorted sounds when the loudspeaker is tuned in the direction of the set, because the sound wave, striking the receiver, causes it to vibrate, and the grids of the tubes to shake.

How to Solve Problem of Body Interference

It is very annoying to tune in a distant station then find that as soon as your hand leaves the dial, the station has disappeared. This effect is known as "body or hand capacity."

We tune in a station by increasing or decreasing the capacity of the tuning condensers, so lowering or raising the wave length to which it is tuned. The condenser has two sets of plates, the rotor and stator plates. When you are seated at your set, your body is earthed and as your hand approaches the condenser dial it has the same effect as if you were to add another plate or two to the condenser.

Hand capacity is usually bad in receivers of the regenerative type and not only makes tuning difficult but also starts the set oscillating very easily. The best thing to try first is to make sure that the rotor plates are connected to earth. The shaft which is attached to the rotor plates comes through the panel and is at the same potential as the hand, so that there is then no capacity effect between the hand and the shaft of the condenser.

If this does not cure the trouble, then the condenser must be shielded. This can be done either with tinfoil or a sheet of thin copper or brass placed between the panel and the condenser. Cut away the shield so that no part of the stator plates comes in contact with it, but connect the rotor plates or ground wire to the shield.

Dust in Sets Is Cause of Loss in Efficiency

Dust in radio sets is often the cause of a large loss in efficiency. This is especially true in wet weather, when the dust becomes damp, and allows the feeble radio currents to leak. The worst places for dust to be allowed to collect is about binding posts and terminals and between the plates of rotary variable condensers. It may be removed from between wires and around terminals with a small brush, about two inches wide. The engineers in laboratories often use pipe cleaners, the same as used for cleaning the stems of ordinary smoking pipes, for removing dust from between condenser plates and from other otherwise inaccessible places. It would be good practice for the set owner to carefully dust his set in this way, as often as once a month.

To Build Loop

A loop one foot square will work with a sensitive receiver. Set the two crosspieces in the shape of an X and attach the upright piece to one of them. Cut slots in the end of each of the four ends of the crosspieces to receive four pieces of hard rubber 7 by 1 by ¼ inch. Now wind 26 turns of loop wire or standard single lamp cord ¼-inch apart about the rubber pieces set perpendicular to the frame of the loop.

LOOT!

By ELMO SCOTT WATSON

(©, 1926, Western Newspaper Union.)

Pirate and Socialist

CAPT. CHARLES BELLAMY was a man of socialistic views who put in practice his belief, that all wealth should be equally divided, by engaging in piracy. He began his career as a wrecker in the West Indies, but finding that this means of amassing wealth was a slow one, he turned to piracy on the high seas. Associated with him was another young man, named Paul Williams, who held similar views and similar desires.

They obtained a ship—history does not record by what means—and began plundering shipping along the New England and Carolina coasts with an occasional cruise off Newfoundland when the weather and the pursuit by the forces of the law became too hot. Bellamy considered himself a natural orator and never passed up an opportunity to exhibit his gifts, especially when there was the added opportunity of expounding his socialistic views.

Upon one occasion he captured a sloop and when its commander, Captain Beer, pleaded for its return after its cargo had been seized by the pirates, Bellamy harangued him as follows:

"I am sorry that you can't have your sloop again, for I scorn to do anyone any mischief—when it is not to my advantage—though you are a sneaking puppy, and so are all those who will submit to be governed by laws which rich men have made for their own security, for the cowardly whelps have not the courage to defend otherwise what they get by their knavery. But d—n ye altogether for a pack of crafty rascals, and you, who serve them, for a parcel of hen-hearted numbskulls! They vilify us, the scoundrels do, when there is the only difference that they rob the poor under the cover of the law, forsooth, and we plunder the rich under the protection of our own courage. Had you not better make one of us than sneak after these villians for employment?"

Bellamy gathered around him a whole fleet of pirate ships, the flagship of which was his own vessel, the Whidnaw. The end of his piracy came when he seized the whaling ship, Mary Anne, whose captain brought about Bellamy's downfall. The pirate leader, knowing that the whaler's captain knew the coast well, made him pilot for the fleet. So the crafty captain took advantage of his opportunity and ran the Whidnaw on a sandbank off Eastman, Mass., one dark night. The remainder of the fleet followed the Whidnaw's stern light on the rocks and all of them were wrecked. Only seven of the pirates were saved and they were saved only to be hanged in Boston in 1726.

"Bad Luck" Burgess' Career

JUST why Capt. Samuel South Burgess should have "gone on account" is difficult to understand. A native of New York, he was a man of education, social position and some wealth. But in the school of legalized privateering in the West Indies he first learned his lesson of violence which sent him eventually out under the Jolly Roger. Then, too, his employer, a New York shipbuilder and owner, hired him to trade with the pirates in Madagascar, and in that occupation it was easy enough for him to do some freebooting on his own account.

He disposed of several prize ships in the West Indies and then returned to New York to give an accounting to his employer. At Sandy Hook he purposely wrecked his vessel and landed as an honest shipwrecked sailor. His employer, Phillips by name, evidently still held him in high regard for Burgess settled down for awhile, married a relative of Phillips, and a short time later was sent out on two more voyages which he conducted honestly enough and profitably to them both.

A later voyage came near proving his undoing. He had been trading with the pirates in Madagascar and was returning home with several of them as passengers when his ship was captured by an East Indiaman off of the Cape of Good Hope and taken to Madras. The captain and his companions were put in irons and sent to England for trial. Burgess, however, was freed, but instead of leaving the country lingered around London. There he fell in with an old pirate comrade who betrayed him and again he was put on trial. He was condemned to death, but at the last moment was pardoned by the queen.

Then he shipped as mate of a Scotch vessel, the Neptune, and soon afterwards was a ringleader in a mutiny. The mutineers refitted the Neptune and embarked upon a career of plundering which proved very successful. Finally Burgess decided to retire from piracy and settled in Madagascar.

But he took to the sea again and bad fortune persistently followed him until "Burgess' Bad Luck" became almost proverbial. While serving under one pirate captain, he was accused of betraying some of his comrades, and all of his savings taken away from him. On another voyage he was captured by Dutch pirates who in turn were captured by some French corsairs who marooned Burgess and his mates on the east coast of Africa. At Youngoul Burgess shipped as third mate on a vessel bound for the West Indies. Then came the climax of his unfortunate career. He was sent as ambassador to a local king whom he had once offended. So the monarch gave him some poisoned liquor and the gallows was cheated again.

WINTER HIGHWAYS MADE SAFE FOR AUTOS

The new hard surface pavements of the Middle West have developed problems in relation to snow. After a series of experiments, Wisconsin has found a plow pushed ahead by a heavy motor truck to be the most effective method of removing the fleecy drifts. The state keeps scores of these trucks and plows stored at various points, ready to start out with each snowfall, assuring access and safety to the motorists.

TO PREVENT AUTO SKIDDING ON ICE

Winter Driving Is Attended With Elements of Danger.

"Driving an automobile over packed and polished snow is an undertaking not without an element of danger," says a bulletin issued by the mechanical first aid department of the Chicago Motor club, "and a better knowledge of the way in which a car acts under these conditions will make for the safety of the winter driver.

Chains Are Useful.

"The inexperienced driver has heard veteran drivers extol the use of chains, with the result that the tyro comes to believe that chains are an absolute skid preventive. It comes as a surprise then, for him to discover his car skidding when he has taken the precaution to apply chains to his wheels. Driving should not be attempted without chains, but many serious and fatal accidents have happened to drivers who have placed too much confidence in the power of chains to stop a skid. When a quick stop is necessary, the rear wheels are likely to lock; if this occurs, the cross chains part, the bare rubber comes in contact with the icy surface of the road, and a skid results. A skid of this kind generally can be stopped by releasing the brake for a second and then applying it again. On long trips it is advisable to carry a stout piece of rope which can be bound around a section of the wheel if the chain should break.

"Another difficulty in winter driving is that snow and sleet form a coating of ice which the windshield wiper is sometimes powerless to remove. The motorist who is far-sighted enough to carry a bag of salt can quickly remedy this trouble by rubbing the salt over the ice-coated windshield."

Car Under Control.

The bulletin concludes:

"The beginning of all wisdom in winter motoring is, however, in knowing that anything may happen, and that the only way to be sure is always to have the car under complete control. If a motorist has arrived at this stage of driving wisdom, he will never fall into the most common of winter driving mistakes, that of traveling fast in ruts of snow. He will know how difficult it is to turn out for an oncoming car, and he will realize that a quick turn is liable to have disastrous results."

Anti-Knock Gasoline Is Great Aim of Uncle Sam

Uncle Sam has determined to take the "knock" out of gasoline. Experts of the bureau of standards are deep in study of motor fuel problems and it is believed that the day is not far distant when the objectionable features will be eliminated. The research is being directed in two channels—study of the characteristics of "anti-knock" gasoline and the starting qualities of the fuel in general.

S. W. Sparrow, who is in charge of these efforts, says that the experimentation in driving power is attracting widely increasing attention throughout the country because the rapid gains in the number of good roads and closed automobile bodies have added so materially to winter driving that millions are eager to learn of easier ways of starting vehicles in cold weather.

For more than a year the government experts have been experimenting with three grades of gasoline.

In Cold Weather Warmth Is Essential for Motor

In hot weather cooling is what your motor needs, while in cold weather warmth is the essential thing. When summer wanes you can't just cover the front of your radiator, because after a short run overheating would soon burn up your motor.

What the motorist needs is to have the front of his radiator covered only until his motor is hot, and then just enough air let in to keep the motor hot without overheating, experts say.

There is a device on the market that does this automatically.

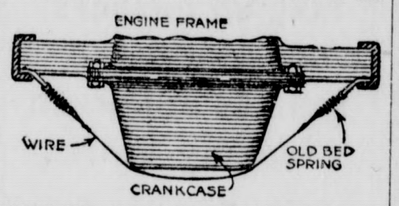
A winter front can be installed in ten minutes. Almost any car dealer can

New Driver Tires Easily

Fear causes the inexpert driver to grow tired physically. He gets too emotional. He suffers acutely from keeping his muscles keyed up, his ears cocked for every sound and his eyes alert. Every action is work. When he puts on the brake he has to "think" about it. He keeps his mind on the steering. He gets worn out in the first hundred miles. After he learns to drive, the whole business is automatic and he has no worries and does not use up either physical or mental strength.

Removing or Replacing Crankcase Is Difficult

To remove or replace a crankcase is a difficult and annoying job for one man. Jacking or blocking up the case helps, but is somewhat awkward and may cause dents in the bottom of the



While Replacing the Bolts, a Crankcase May Be Supported With Wires and Springs.

case. A better method is to use a few old springs and two or three lengths of hay-baling wire, or wire of equal strength. On one job I saved an hour by this means.

If no mud-pan clips are provided, stiff pieces of heavy wire may be bent to the proper shape for attaching the supports and hooked or fastened to the springs or frame. The supports should be of a length to suit the car; the ones I used were 18 inches long.—Richard C. Tarr, in Popular Science Monthly.

Good Driver Is Always on Alert for Danger

"Years ago the man who could drive fast was considered a good driver," says Charles M. Hayes, president of the Chicago Motor club. "Times have changed. Any fool can drive fast nowadays. The good driver is made through experience and education. He is always on the alert for danger. Here are some of the things that indicate a 'good driver':

"He stops at railroad crossings and looks both ways before crossing. On a grade he always crosses in low speed. He stops before emerging from an alley, and blows his horn. He signals his intentions to those in the rear. He never pulls away from a curb without looking back to see if the road is clear. He gets over on to the inside lane of travel when turning left, and he pulls over near the curb when turning right. He never passes another car going in the same direction at a street intersection; he knows pedestrians are injured that way. He slows down when passing schools, churches, or buildings where public gatherings take place. He never passes another car on a hill or on a curve. He gives the right-of-way to cars approaching from the left. He slows down to ten miles an hour at street car crossings. He is courteous to other motorists and to pedestrians. He knows the laws and ordinances, and obeys them. Everyone likes to ride with the good driver."

Truck Making Calls for Precision in Machinery

Motor trucks, in the minds of most people, are associated with brute strength. A rather common supposition is that precision is less necessary in a truck than in a racy roadster, for instance, until one is reminded that the passenger car carries comparatively light loads over boulevards and improved highways, and is tenderly handled for the first 500 or 1,000 miles.

But a motor truck may find itself in roadless oil fields under heavy loads of machinery the week it goes into service and be expected to plunge into the hardest toil without preliminary breaking in. Which situation calls for tougher metals, more precise machinery, more exacting factory

Back Bad This Winter?

Too Often Backache Is Kidney Ache

Winter's colds and chills are hard on the kidneys. And when your kidneys are overworked, you are apt to have daily backache, stabbing pains and bladder irregularities. Don't risk neglect. Use *Doan's Pills*. *Doan's* are recommended the world over. *Ask your neighbor!*

A California Case

John Ferns, retired Justice of the Peace, 3626 1st Ave., Sacramento, Calif., says: "My back pained continually and when I stooped it was difficult to straighten, for those pains dug in deeper. I had to get up nights to pass the kidney secretions, which were scanty. After using Doan's Pills, I was rid of the trouble."

Educator Caught Napping

Even superintendents of schools are not above learning from the unabashed criticism of small school children, William McAndrew revealed in a recent talk when he told one on himself.

"O-oh, you're not educated!" ejaculated a small lass sitting in his office one day. The educator, busily turning the pages of a book in search of a certain reference, stopped to inquire into this unexpected indictment.

"Why do you think I'm not?" he asked of the accusing maid.

"Because our teacher says that educated people always use the index when they want to find something in a book. Only ignorant ones go looking through the pages."—Chicago Evening Post.

A simple, old-fashioned medicine, as good today as in 1837, is compounded in Wright's Indian Vegetable Pills. They regulate the stomach, liver and bowels. Adv.

Coolie Labor Not Cheap

A Chinese coolie who works for 10 cents a day is paid, according to standards of this country, 20 times what he is worth because he can only move one ton a mile in a day. American railroads move one ton one mile at a cost of only ½ cent. The great contrast illustrates the difference between man strength and mechanical power.

It's the little things that count—especially in the primary arithmetic class.

NEWS NOTES OF PERSONAL INTEREST

By MARC WORST

Miss Violet McIsaac spent the week end in Stockton.

Mr. Casod is again teaching his music pupils of Daly City, after a recent three weeks' illness.

John J. Harper, chief of police of Burlingame, was in Daly City last Wednesday, and called at the Record office.

Mr. and Mrs. J. Myer, of Vallejo, spent the week end with the former's mother, Mrs. L. Ross, of Los Olivos avenue.

Miss Clara Foppiano has returned home from St. Luke's hospital and is on her way to recovery from her recent iliness.

The grand ball held by Congregation B'Nai Israel last Saturday night was a big success both financially and socially. The proceeds will be devoted to a number of needed repairs to be made to the Synagogue.

Miss Ruth Walmick, of Wellington avenue, is in St. Mary's hospital.

The Daughters of Israel of Congregation B'Nai Israel held their regular meeting last Thursday night.

Miss Mary Johnston and Miss Vivian Nagel were the guests of Miss Ruth Moran on last Wednesday evening.

All the safety zones and parking stations in Daly City are being repainted. J. Hawkins is foreman of the job.

Last Monday funeral services were conducted in Redwood City for Mrs. Virginia Lord, a pioneer resident of San Carlos.

Murphy McHenry, of the San Mateo Times, was in Daly City last Wednesday on business, and found time to call at the Record office.

Don't forget the Claremont social dance Sunday afternoons, at Colma Auditorium. A good time is assured all. Music by O'Connor's syncopators.

M. Rancatore, of 99 Evergreen avenue, had his new Veile stolen last Saturday night. Marshal Doyle, on the job as usual, found it Sunday morning.

The office of the city clerk is being remodeled. This improvement will put his office on a par with that of the water clerk, which was remodeled last week.

Quite a number of the members of the drill team of El Carmelo Parlor are planning on attending a dansant given at Sequoia Club, Saturday evening, March 6.

Miss Kraus, of Irvington street, was married last Wednesday to Mr. Hannan, of San Francisco.

The Daly City Methodist Episcopal church is holding its anniversary dinner tonight in the church.

P. Murray is erecting a building on Hanover street and will open it as a grocery store in the near future.

Lenten services will be held at 8 p. m. every Wednesday and Friday evening during Lent, at St. Maximus church.

A St. Patrick's dance will be given by St. Maximus church on St. Patrick's eve, March 16, in the Daly City Auditorium.

Mrs. Myer, of Los Banos avenue, is recovering after her return from six months at Suissun, where she became seriously ill.

The Crocker-Pershing P. T. A. held a successful hot dog sale last Thursday noon at the Crocker school, about $15 being cleared.

William Carmichael, the plumber, reports business as excellent these days, which is an indication of the growth of this section.

The machine belonging to J. Blair, of Daly City, was stolen last week in San Francisco. Marshal Doyle of Daly City located it before the San Francisco police even found "the clew."

The pupils of Eula Grandberry will give an excellent studio recital next Saturday in the Jefferson Union high school auditorium, for the benefit of the Woodrow Wilson-Vista Grande P. T. A.

Robert Russell, of South San Francisco, has charge of the survey work which is being conducted in San Mateo and Burlingame towards the establishment of a peninsula lodge of the Loyal Order of Moose.

El Carmelo Parlor No. 181, Native Daughters of the Golden West, held its sixteenth birthday dinner at Lidos' Cafe last Thursday night. There was a large number present. All had a very enjoyable time.

The St. Maximus Girls' Club have postponed their regular meeting to Tuesday evening, March 9. The club's president, Lorraine Wall, wishes all the members to be present as this will be a very important meeting.

The monthly whist of the Ladies' Auxiliary to Company No. 4, Daly City Volunteer Fire Department, will be held Thursday evening, March 4, at the fire house, Peoria street. Score cards 25 cents. Spectators 10 cents.

James Duerner and wife, Mr. M. Roberts of San Francisco, and William Carmichael motored down to Pescadero last Sunday and all got the limit of steelheads. Mrs. Duerner carried off the honors, catching the largest fish that was taken during the day.

While crossing the tracks at the foot of North Park avenue, Poundmaster George Burick's machine was stalled. He got out to crank it, when the machine backed down over the cliff. It was quite badly damaged and its cargo of eight dogs escaped.

Mrs. S. A. Landini held a Martha Washington costume party at her home last Monday evening, Washington's birthday. A number of ladies from Daly City were present. The decorations were very beautiful and in keeping with the colonial thought.

Several women of Crocker Tract have reported being annoyed by a young man following them at night. Marshal Doyle, on investigation, found the annoyer to be merely a harmless imbecild. He turned him over to County Probation Officer Rapp, who sent him to the Sonoma state home for the feeble minded.

The Twin Peaks Fife, Drum and Bugle Corps will hold a "49er" night at Willopi Hall, 4061 Twenty-fourth street, on Saturday night, February 27. All those attending this affair will be shown a good time. They will feature many novelties pertaining to the older days, and all members will be dressed in costumes of that period.

A number of young ladies of El Carmelo Parlor drill team returned Tuesday after a four days' stay at Truckee and Donner Lake. They report having had a wonderful time during the snow carnival, and brought home to their friends lovely souvenirs. Among those who made the trip were: Sylvia Fischer, Lorraine Wall, Teresa O'Connor, Margaret O'Connor, Grace Johnston, Elsie Fahey, Ruby O'Connor and Ernie Klaum.

Mrs. George Tway, of 750 Bellevue avenue, gave a delightful birthday party in honor of her little daughter Joan's seventh birthday last Monday afternoon. Among the guests were: Alice Johnson, Betty Best, George Tway, Phyllis Best, Zelda Kohlman, Beatrice Cuneo, Ernestine Cuneo, Marian Cobleigh, Ellen Peterson, Dorothy Lewis, Dolores Comley, Katherine Tway and the guest of honor, Joan Tway, who had the distinction of celebrating her birthday on the same day as George Washington. Mrs. Tway was assisted in entertaining the little guests by Mrs. E. Cuneo.

: : RADIO : :

Conducted by Marc Worst

This week the column is devoted to a short discussion of several new or important points in radio.

During the past week, the radio editor has noticed in several homes that a great deal of current is being wasted. To conserve curretn, proceed thusly:

Tune in on a station with the tuning dials, as loud as possible. Now turn down the rheostats until the volume is as loud as desired. Often turning the rheostats half off will make no difference at all in the volume. If the set squeals and does not stop it by only lowering the rheostats, turn one of the tuning dials slightly. By turning the filaments of the tubes low enough to secure reasonable volume, you will save batteries, both "A" and "B," and tubes. The one will usually be better. As the batteries wear out it will become necessary to turn the rheostats up somewhat.

Recently a new fixed crystal detector has come on the market. It uses carborundum and is very stable and sensitive. Back in 1905-1915, carborundums were used somewhat, but were not as sensitive as other crystals. This new unit is by far the best of all fixed detectors we know of. It can be knocked around and will not get out of adjustment easily. A stabilizing unit, consisting of a potentiometer and a one and one-half volt battery shunted across the detector, may be used, but the detector works excellently without it. In the old days, this stabilizer was a necessity to get any results from a carborundum.

When purchasing fixed condensers, purchase one of good make. Be sure they have good clamps, well riveted on the edges. Do not purchase cheap ones, having no clamps and loosely wrapped. Their capacity will change with differences in temperature, dampness in the air, pressure on them, or rough handling. They often make excessive noises and tear easily.

Doctors advise windows open the year round. Burglars also favor it.

NOTICE OF SALE OF REAL PROPERTY AT PRIVATE SALE

No. 42,612. Dept. 9.

In the Superior Court of the State of California, in and for the City and County of San Francisco.

In the Matter of the Estate of A. Miles Taylor, also known as Albert Miles Taylor, deceased.

Notice is hereby given, that under and by virtue of the provisions of Article IV of Chapter VII of Title XI, Part III, of the Code of Civil Procedure, the undersigned, JENNIE TAYLOR, executrix, and CLARENCE W. WESTBROOK, executor, of the last will and testament of A. MILES TAYLOR, also known as ALBERT MILES TAYLOR, deceased, will sell at private sale on or after the 15th day of March, 1926, at ten o'clock A. M. of said day, to the highest bidder therefor, upon the terms and conditions hereinafter mentioned, subject to confirmation by the above-entitled Superior Court, all of the right, title, interest and estate of said deceased, in and to those certain parcels of real property situate, lying and being in the County of San Mateo, State of California, particularly described as follows, to-wit:

Lot twenty-nine (29) and fifty (50) feet strip of land (formerly known as Lot thirty) between said Lot twenty-nine (29) and Lot thirty-one (31), as designated on the map entitled "Finger Park Tract, adjoining Wellesley Park, Redwood City, Cal.", which map was filed in the office of the Recorder of the County of San Mateo, State of California, February 21, 1907, in Volume "A" of Maps at page 35 and a copy thereof entered in Volume 4 of Maps at page 55.

Terms of Sale: Ten percent (10%) of the purchase price shall be paid with the bid for said property, the balance to be paid at the time of the confirmation of the sale of said property by said Superior Court and the tender of the deed for said property. All bids or offers must be in writing and will be received at the office of James E. Colston, Esq., attorney for said executrix and executor, at Room 719 Flood Building, 870 Market Street, San Francisco, California, or may be delivered to the undersigned executrix or executor personally, or may be filed in the office of the Clerk of said Court, at any time after the first publication of this notice and before the making of the sale.

The executrix and executor reserve the right to reject any and all bids.

Dated this 19th day of February, 1926.

JENNIE TAYLOR, Executrix.
CLARENCE W. WESTBROOK, Executor, of the last will and testament of A. Miles Taylor, also known as Albert Miles Taylor, deceased.

James E. Colston, Attorney for Executrix and Executor, 719 Flood Building, San Francisco, California.

Feb. 26; March 5-12, 1926.

SMITH'S THE NAME

First Captain John a Smith was he
Who put the thing across
That made a home for you and nie,
Where our own crowd is boss.

Then the batteries, Smith & Wesson,
Hurled balls across the plate
Until the old world war fans
Found their stuff was out of date.

The brothers two who fought the flu,
Both stern and bearded men,
You ne'er find one without the other,
Now beat that if you can.

And last a lad with eagle's wings,
Fearless and straight has ploughed
With old name around the world,
And looped it on a cloud!

—Cad Allen.

Marshal Doyle warns all persons leaving their homes at night to attend a theatre or entertainment to close all windows and lock them. Several prowlers and sneak thieves have been reported as operating in Daly City. The marshal also request that the porch light be left burning, when the family is absent, so as to aid the officer on his night patrol.
